Potsdam Kirchsteigfeld:

Potsdam Kirchsteigfeld Rob Krier, Christoph Kohl, 1998-10 *The Making of a Town* documents the creation of Kirchsteigfeld a town for 10 000 inhabitants with distinctive urban qualities from what was in 1991 a stretch of derelict land. The remarkable achievement of the architects Rob Krier and Christoph Kohl has resulted in the creation of agreeable spaces and landmarks a richness designed with the greatest possible individuality a reminder of the urbanity of European cities of the past. The question whether each generation must redefine the city for itself or whether there are archetypes of humanistic architecture can only be resolved through practice. The architectural richness of Kirchsteigfeld offers a valuable example.

The New Tenement Florian Urban, 2017-10-12 This book examines new tenements dense medium rise multi storey residences that have been the backbone of European inner city regeneration since the 1970s and came with a new positive view on urban living. Focusing principally on Berlin Copenhagen Glasgow Rotterdam and Vienna it relates architectural design to an evolving intellectual framework that mixed anti modernist criticism with nostalgic images and strategic goals and absorbed ideas about the city as a generator of creativity locale of democratic debate and object of personal identification. This book analyses new tenements in the context of the post functionalist city and its mixed use neighbourhoods redeveloped industrial sites and regenerated waterfronts. It demonstrates that these buildings are both generators and outcome of an urban environment characterised by information exchange rather than industrial production individual expression rather than mass culture visible history rather than comprehensive renewal and conspicuous difference rather than egalitarianism. It also shows that new tenements evolved under a welfare state that all over Europe has come under pressure but still to a certain degree balances and controls heterogeneity and economic disparities.
