Telling Tales and Crafting Books Dorsey Armstrong,Shaun F D Hughes,Alexander L Kaufman,2016-07-05 The great corpus that is medieval literature contains at its very center the tale These verse and prose fictional narratives as well as stories that are grounded in some degree of historical truth are the foundation of what readers scholars and enthusiasts often

point to as signifiers of the medieval age These tales from the skillfully crafted to the more rudimentary and plain often make familiar to modern readers what seems so distant and foreign about the Middle Ages This volume of essays focuses on the tale and its ability to create mirth what modern audiences would often define as happiness or joy and the significance that the book has had on the transference of this mirth to audiences This volume also celebrates the scholarship of Thomas H Ohlgren a medievalist whose work encompasses a number of different areas but at its center lives the power of the tale and its ability to create a lasting impression on readers both medieval and modern **The City of London chess magazine, ed. by W.N.
