Pottery Function A Use Alteration Perspective:

Pottery Function James M. Skibo, 1992-09-30 There are many ways to study pots or the sherds of pots In this book James Skibo has focused on the surface wear and tear found on the resin coated low fired cooking pots of the Kalinga people in north western Luzon This detailed analysis is part of a much larger evaluation of Kalinga pottery production and use by the staff members and students at the University of Arizona that has been underway since 1972 Here he has analyzed the variants among the possible residual clues on pots that have endured the stresses of having been used for cooking meat and vegetables or rice standing on supports in the hearth fire wall scrapings while distributing the food being transported to the water source for thorough washing and scrubbing followed by storage until needed again a repetitive pattern of use This well controlled study made use of new pots provided for cooking purposes to one Kalinga household as well as those pots carefully observed in other households 189 pots in all Such an ethnoarchaeological approach is not unlike following the course of the firing of a kiln load of pots in other cultures and then purchasing the entire product of this firing for analysis Other important aspects of this Kalinga study are the chemical analysis of extracts from the ware to deduce the nature of the food cooked in them and the experimental study of soot deposited on cooking vessels when they are in use **Pottery Function** James M.

Skibo, 2014-01-15 Use-Wear and Residue Analysis in Archaeology João Manuel Marreiros, Juan F. Gibaja Bao, Nuno Ferreira Bicho, 2014-11-06 This book is designed to act as a readily accessible guide to different methods and techniques of use wear and residue analysis and therefore includes a wide range of different and complementary essential topics experimental tests observation and record methods and techniques and the interpretation of a diversity of tool types and worked raw materials The onset of use wear studies was marked by the development of theory method and techniques in order to infer prehistoric tools functionality and therefore understand human technological social and cultural behavior The last decade of functional studies use wear and residue analysis have been aimed at the observation recording and interpretation of different activities and worked materials found on archaeological tools made on different types of organic and non organic materials This international group of contributions will be fundamental for all researchers and students of the discipline *Indigenous Archaeology in the Philippines* Stephen Acabado, Marlon Martin, 2022-04-05 Dominant historical narratives among cultures with long and enduring colonial experiences often ignore Indigenous histories This erasure is a response to the colonial experiences With diverse cultures like those in the Philippines dominant groups may become assimilationists themselves Collaborative archaeology is an important tool in correcting the historical record In the northern Philippines archaeological investigations in Ifugao have established more recent origins of the Cordillera Rice Terraces which were once understood to be at least two thousand years old This new research not only sheds light on this UNESCO World Heritage site but also illuminates how collaboration with Indigenous communities is critical to understanding their history and heritage Indigenous Archaeology in the Philippines highlights how collaborative archaeology and knowledge co

production among the Ifugao an Indigenous group in the Philippines contested and continue to contest enduring colonial tropes Stephen B Acabado and Marlon M Martin explain how the Ifugao made decisions that benefited them including formulating strategies by which they took part in the colonial enterprise exploiting the colonial economic opportunities to strengthen their sociopolitical organization and co-opting the new economic system The archaeological record shows that the Ifugao successfully resisted the Spanish conquest and later accommodated American empire building This book illustrates how descendant communities can take control of their history and heritage through active collaboration with archaeologists Drawing on the Philippine Cordilleran experiences the authors demonstrate how changing historical narratives help empower peoples who are traditionally ignored in national histories **Soils in Archaeological Research** Vance T. Holliday, 2004-08-19 Soils invaluable indicators of the nature and history of the physical and human landscape have strongly influenced the cultural record left to archaeologists In this book the author addresses each of these issues in terms of fundamentals as well as in field case histories from all over the world **Sedentism and Mobility in a Social Landscape** Mark Varien, 1999 Research on hunting and gathering peoples has given anthropologists a long standing conceptual framework of sedentism and mobility based on seasonality and ecological constraints This work challenges that position by arguing that mobility is a socially negotiated activity and that neither mobility nor sedentism can be understood outside of its social context Drawing on research in the Mesa Verde region that focuses on communities and households Mark Varien expands the social spatial and temporal scales of archaeological analysis to propose a new model for population movement Rather than viewing sedentism and mobility as opposing concepts he demonstrates that they were separate strategies that were simultaneously employed Households moved relatively frequently every one or two generations but communities persisted in the same location for much longer Varien shows that individuals and households negotiated their movements in a social landscape structured by these permanent communities Varien's research clearly demonstrates the need to view agriculturalists from a perspective that differs from the hunter gatherer model This innovative study shows why current explanations for site abandonment cannot by themselves account for residential mobility and offers valuable insights into the archaeology of small scale agriculture **Archaeological Theory Today** Ian Hodder, 2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume

increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to external influences as well as the desire to contribute to wider debates The contributors examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of *Archaeological Theory Today* will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally

Milk and Honey Sarah Malena, David Miano, 2007-06-30 From the Foreword In a very short stretch of years the Judaic Studies Program at the University of California San Diego has developed into one of the most important centers for teaching and research in biblical studies in ancient Near Eastern and biblical archaeology and more generally in Judaic studies The program now rivals far older centers of study in these fields in eastern research universities I have been an admirer of the program for some years proud of former students of mine whose energy and foresight have contributed to the developments in La Jolla including the establishment of endowed chairs that guarantee the future of this center and its program This collection of essays honoring the Judaic Studies Program and its faculty is a testimony to the fecundity of the program in producing scholars whose essays dominate the collection Several essays come from other scholars whose home base is in the West and who have engaged in colloquia and common pursuits with the San Diego faculty There are sections on Genesis poetry and prophecy narrative and history lexicon archaeology and not least paleography Frank Moore Cross Harvard University

Diversity and Complexity in Prehistoric Maritime Societies Bruce J. Bourque, 2007-09-04 New England archaeology has not always been everyone's cup of tea only late in the Golden of nineteenth century archaeology as archaeology's focus turned westward did a few pioneers look northward as well causing a brief flurry of investigation and excavation Between 1892 and 1894 Charles C Willoughby did some exemplary excavations at three small burial sites in Bucksport Orland and Ellsworth Maine and made some models of that activity for exhibition at the Chicago World's Fair These activities were encouraged by E Putnam director of the Harvard Peabody Museum and head of anthropology at the Columbian Exposition Even earlier another director of the Peabody Jeffries Wyman spawned some real interest in the shellheaps of the Maine coast but that did not last very long Twentieth century New England archaeology specifically in Maine was for its first fifty years rather low key too with short lived but important activity by Arlo and Oric a Bates Harvard student prior to World War Later I another Massachusetts institution the Peabody Foundation at Andover took some minor but responsible steps toward further understanding of the area's prehistoric past

Killarney Bay David S. Brose, Patrick Julig, John M. O'Shea, 2021-11-16 The archaeological site at Killarney Bay on the northeast side of Georgian Bay in Ontario Canada has attracted and mystified archaeologists for decades The quantities of copper artifacts exotic cherts and long distance trade goods all highlight the importance of the site during its time of occupation Yet researchers have struggled to date the site or assign it to a particular cultural tradition since the artifacts and mortuary components do not

precisely match those of other sites and assemblages in the Upper Great Lakes The history of archaeological investigation at Killarney Bay stretches across parts of three centuries and involves field schools from universities in two countries Laurentian University in Canada and the University of Michigan in the United States This volume pulls together the results from all prior research at the site and represents the first comprehensive report ever published on the excavations and finds at Killarney Bay Heavily illustrated Two Millennia at Tocito Paul F. Reed, Kathy Niles Hensler, 2002 *Empire and Domestic Economy* Terence N. D'Altroy, Christine A. Hastorf, 2005-12-27 The Upper Mantaro Archaeological Research Project is a benchmark for a new level of quality in Andean archaeological research This volume continues to develop UMAP approaches to understanding prehistoric Andean economy and polity Mississippian Community Organization Michael J. O'Brien, 2001-05-31 The Powers Phase Project a multiyear archaeological program undertaken in southeastern Missouri by the University of Michigan in the late 1960s and early 1970s represents a milestone in Americanist archaeology This volume reinterprets a number of the earlier conclusions from the long term excavations of the Turner and Snodgrass sites and enhances the usefulness of the findings for archaeologists interested in the late prehistory of the Mississippi River Valley

A Hunter-Gatherer Landscape Michael A. Jochim, 1998-05-31 As an archaeologist with primary research and training experience in North American arid lands I have always found the European Stone Age remote and impenetrable My initial introduction during a survey course on world prehistory established that for me at least it consisted of more cultures dates and named tool types than any undergraduate ought to have to remember I did not know much but I knew there were better things I could be doing on a Saturday night In any event after that I never seriously entertained any notion of pursuing research on Stone Age Europe that course was enough for me That is a pity too because Paleolithic Europe especially in the late Pleistocene and early Holocene was the scene of revolutionary human adaptive change Ironically all of it was amenable to investigation using precisely the same models and analytical tools I ended up spending the better part of two decades applying in the Great Basin of western North America Back then of course few were thinking about the late Paleolithic or Mesolithic in such terms Typology classification and chronology were the order of the day as the text for my undergraduate course reflected Jochim evidently bridled less than I at the task of mastering these chronotaxonomic mysteries yet he was keenly aware of their limitations in particular their silence on how individual assemblages might be connected as part of larger regional subsistence settlement systems **Resources, Power, and Interregional Interaction** Edward M. Schortman, Patricia A. Urban, 2013-03-09 Archaeological research on interregional interaction processes has recently reasserted itself after a long hiatus following the eclipse of diffusion studies This rebirth was marked not only by a sudden increase in publications that were focused on interaction questions but also by a diversity of perspectives on past contacts To perdurable interests in warfare were added trade studies by the late 1960s These viewpoints in turn were rapidly joined in the late 1970s by a wide range of intellectual schemes stimulated by developments in French Marxism referred to in

various ways termed political ideology here and sociology Immanuel Wallerstein's world systems model Researchers ascribing to the aforementioned intellectual frameworks were united in their dissatisfaction with attempts to explain sociopolitical change that treated individual cultures or societies as isolated entities Only by reconstructing the complex intersocietal networks in which polities were integrated the natures of these ties who mediated the connections and the political economic and ideological significance of the goods and ideas that moved along them could adequate explanations of sociopolitical shifts be formulated Archaeologists seemed to be re-discovering in the late twentieth century the importance of interregional contacts in processes of sociopolitical change The diversity of perspectives that resulted seemed to be symptomatic of both an uncertainty of how best to approach this topic and the importance archaeologists attributed to it

Paso de la Amada Richard G Lesure, 2021-08-29 Paso de la Amada an archaeological site in the Soconusco region of the Pacific coast of Mexico was among the earliest sedentary ceramic using villages of Mesoamerica With an occupation that extended across 140 ha in 1600 BC it was also one of the largest communities of its era First settled around 1900 BC the site was abandoned 600 years later during what appears to have been a period of local political turmoil The decline of Paso de la Amada corresponded with a rupture in local traditions of material culture and local adoption of the Early Olmec style Stylistically the material culture of Paso de la Amada corresponds predominantly to the pre Olmec Mokaya tradition Excavations at the site have revealed significant earthen constructions from as early as 1700 BC Those include the earliest known Mesoamerican ball court and traces of a series of high status residences This monograph reports on large scale excavations in Mounds 1 12 and 32 as well as soundings in other locations The volume covers all aspects of excavations and artifacts and includes three lengthy interpretive chapters dealing with the main research questions which concern subsistence social inequality and the organizational history of the site

Archaeological Theory and Scientific Practice Andrew Jones, 2001-12-06 Is archaeology an art or a science This question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals

Encyclopedia of Historical Archaeology Charles E. Orser Jr, 2002-09-11 The Encyclopedia of Historical Archaeology is a ground breaking compendium of information about this ever growing field Concentrating on the post 1400 period as well as containing generic explanations of historical archaeology where needed the encyclopedia is compiled by

over 120 experts from around the world and contains more than 370 entries covering important concepts and sites

Ceramics and Change in the Early Bronze Age of the Southern Levant Graham Philip, Douglas Baird, 2000-12-01

This book sets out the primary issues and current debates in the use of ceramics to reconstruct and explain cultural economic and social processes in the Early Bronze age By bringing together research on pottery from various parts of the southern Levant it allows direct comparison of contemporary material from different regions Alongside these empirical studies are discussions of general ceramic issues so that the book highlights the potential of pottery as an investigative tool and indicates fruitful directions for future research within the traditionally conservative field of Levantine archaeology

Designing Experimental Research in Archaeology Jeffrey R. Ferguson, 2010-05-15 *Designing Experimental Research in Archaeology* is a guide for the design of archaeological experiments for both students and scholars Experimental archaeology provides a unique opportunity to corroborate conclusions with multiple trials of repeatable experiments and can provide data otherwise unavailable to archaeologists without damaging sites remains or artifacts Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures and are placed in a theoretical context and contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology The field has long been in need of a guide that focuses on methodology and design This book fills that need not only for undergraduate and graduate students but for any archaeologist looking to begin an experimental research project
