most people in wealthy Western contexts are morally obligated to avoid animal products This book explains why the author thinks that s mistaken He reaches this negative conclusion by contending that the major arguments for veganism fail they don t establish the right sort of connection between producing and eating animal based foods Moreover if they didn t have this problem then they would have other ones we wouldn t be obliged to abstain from all animal products but to eat strange things instead e g roadkill insects and things left in dumpsters On his view although we have a collective obligation not to farm animals there is no specific diet that most individuals ought to have Nevertheless he does think that some people are obligated to be vegans but that s because they ve joined a movement or formed a practical identity that requires that sacrifice This book argues that there are good reasons to make such a move albeit not ones strong enough to show that everyone must do likewise
