Augello,Marco E.

L Guidi, 2012-08-06 The book studies the origins and evolution of economic textbooks in the nineteenth and early twentieth century up to the turning point represented by Paul Samuelson's *Economics* 1948 which became the template for all the textbooks of the postwar period. The case studies included in the book cover a large part of Europe: the British Commonwealth, the United States and Japan. Each chapter examines various types of textbooks: from those aimed at self-education to those addressed to university students, secondary school students to the short manuals aimed at the popularisation of political economy among workers and the middle classes. An introductory chapter examines this phenomenon in a comparative and transnational perspective. *The Palgrave Handbook of Conflict and History Education in the Post-Cold War Era* Luigi Cajani, Simone Lässig, Maria Repoussi, 2019-06-28 This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged, including the legacies of socialism and communism, war, dictatorships and genocide, issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies. Book Catalogues: 1894, 1894 *Philosophy of History and Action* Y. Yovel, 2012-12-06 This volume contains the proceedings of the First Jerusalem Philosophical Encounter, started by the Hebrew University Institute of Philosophy, now the S. H. Bergman Centre for Philosophical Studies, which took place on December 28-31, 1974. In recent years, the culture gap that separates philosophers seems slowly, indeed much too slowly, to be narrowing. Although short circuits in communication still do happen and mutual disrespect has not vanished, it is becoming unfashionable to demonstrate ignorance of another philosophical tradition or to shrug it off with a supercilious smile. Perhaps dialectically, the insufficiency of any self-centred view that tries to immunize itself to challenges from without starts to disturb it from within. Moreover, as the culture and language-bound nature of many philosophical divergencies is sinking more deeply into consciousness, the irony of an attitude of intolerance to them becomes more apparent. Our aim was to make a modest contribution to this development. We did not, however, mean to confuse genuine differences and problems in communication. Consequently, the more realistic term 'encounter' was preferred to the idealizing 'dialogue'. The Israeli hosts, themselves trained in a variety of philosophical traditions, felt that there is something in between: real dialogue on the one hand and mutual estrangement on the other, and wished to provide a meeting place for it.

Revista Română de Știință Politică, 2009 **Other Combatants, Other Fronts** James Kitchen, Alisa Miller, Laura

Rowe, 2011-01-18 The First World War is a subject that has fascinated the public as well as the academic community since the close of hostilities in 1918. Over the past thirty years, in particular, the historiography associated with the conflict has expanded considerably to include studies whose emphases range between the economic, social, cultural, literary, and imperial aspects of the war, all coinciding with revisions to perceptions of its military context. Nevertheless, much of the discussion of the First World War remains confined to the experiences of a narrow collection of European armies on the battlefields of Northern France and Belgium. This volume seeks to push the focus away from the Western Front and to draw out the multi-spectral nature of the conflict, examining forgotten theatres and neglected experiences. The chapters explore the question of what total war meant for the lives of people around the world implicated in this momentous event, broadening current debates on the First World War as well as developing, reinforcing, and refining the existing categories of analysis. The chapters are grouped into sections that reflect neglected elements of the transnational interpretation of the conflict and aspects of the total war debate. These encompass alternative forms of mobilisation, issues of neutrality, ideas of racial identity, and the scope of violence. The volume thus not only expands First World War studies but also contributes to the wider discourse on the shifting nature of warfare in the nineteenth and twentieth centuries. With chapters by leading scholars and early career researchers, this volume draws on a diverse range of original archival research undertaken across disciplinary and national boundaries. The contributions to the volume provide an analysis of the conflict that draws out its full breadth and complexity. The First World War demonstrated the critically important relationship between national mobilisation and total war and saw multiple mobilisations and re-mobilisations of European populations. This theme is explored at the national, regional, and local levels through examinations of the Sicilian province of Catania, the role of science in France and Britain, and the utilisation of the narrative of maritime heroism surrounding the British sailor Jack Cornwell. For Europe's neutrals, the First World War was often as total in its effects as for those states engaged in military operations. Chapters analyse the diverse range of these experiences of neutrality from the economy and people of the Netherlands to the attitudes of Switzerland's intellectuals. Racial interpretations of modern conflict have defined much of the historiography of total war. The complexities of racial analysis with respect to total war are highlighted in chapters dealing with white colonial internees in German East Africa, the treatment of prisoners of war in Europe, and the recruitment of India's primitive peoples for service in labour units. The final section of the volume considers the scale and broad scope of the violence unleashed during the First World War. Chapters on the continuation of German naval war culture after the conflict, the shaping of personal narratives of the war in the Ottoman Empire, and anti-alien violence among veterans in Canada serve to reinforce the extent to which the conflict affected wider aspects of twentieth-century history around the globe. Other Combatants: Other Fronts sheds light on the diverse experiences of neutral and belligerent states and their combatants and civilians during the tumultuous events of 1914-18. This brings to the fore the extent to which the mechanisms of conflict developed during the struggle had a truly

global reach and the impact this has had ever since in defining modern conflict The collection reinforces the notion that although the First World War was a vast and often bewildering industrial conflict it was ultimately a very human phenomenon
