Poverty Bob Holman, 1978 **Poverty : explanations of social deprivation** Robert Holman, 1981 **Deprivation, State Interventions and Urban Communities in Britain, 1968-79** Peter Shapely, 2017-08-16 Focusing on a series of policy initiatives from the late 1960s through to the end of the 1970s this book looks at how successive governments tried to address growing concerns about urban deprivation across Britain It provides unique insights into policy and governance and into the socio economic and cultural causes and consequences of poverty Starting with the impact of redevelopment policies immigration and the rise of the inner city this book examines the pressures and challenges that explain the development of policy by successive Labour and Conservative governments It looks at the effectiveness and limits of different community development approaches and at the inadequacies of policy in tackling urban deprivation In doing so the book highlights the restricted impact of pilot projects and reform of public services in resolving deprivation as well as the broader limits of social planning and state welfare Crucially it also plots the shift in policy from an emphasis on achieving statutory service efficiencies and rolling out social development programmes towards an ever greater stress on regeneration and support for private capital as the solution to transforming the inner city **Demographic Implications of Social Exclusion in**

Poverty and Development in China Caizhen Lu, 2013-03-01 China has made huge economic strides in recent decades but poverty is still a major issue on the agenda for rural China Poverty and Development in China analyses how poverty is recognized and measured and how people in poverty are identified literally asking who is poor in China Lu Caizhen's research compares four approaches to poverty assessment China's official poverty identification method the participatory approach to poverty assessment the monetary approach and use of multidimensional poverty indicators Each of these is applied to the same population of households to identify the poor in rural Wuding County Yunnan Province The analysis shows that there is in fact very little overlap of households identified as poor by the various means and that choice of approach does matter in the outcome of who is identified as poor This has implications at the theoretical methodological and policy levels Lu discusses these in detail concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities as these are often short term efforts Instead the focus should move towards a broader combination of short term and long term strategies to break poverty's inter linked structural causes

Africa's Social and Religious Quest Randee Ijatuyi-Morphé, 2014-01-30 This well crafted book probes the key dimensions of Africa's existential predicament It constitutes an intellectual response to a gnawing African situation the starting point for grasping Africa's social and religious quest Beyond split explanations of external versus internal factors e.g. colonization slavery vs leadership cultural values this study accounts more comprehensively for emergent issues shaping this situation The situation reflects a gamut of problems in traditional African religion and material culture which hitherto defines African communality politics and destinies vis vis the cosmos and nature Thus African religion and communities each with its own attendant values do not operate by critical engagement with larger issues of society and civilization especially those shaped by the advent of post modernity Rather they operate via adaptation The communal drive for natural and social harmony inevitably produces a preservationist view of culture leaving things as they are This study takes an integrative approach to religion society and civilization eschews dichotomies and broadly defines and re signifies life and wholeness as a true end of Africans quest today

Social Exclusion in Great Britain Matt Barnes, 2019-06-04 Originally published in 2005 In Great Britain the reduction of social exclusion has been at the forefront of New Labour's social policy

since 1997 However there is ambiguity about what the notion of social exclusion actually encompasses caused in part by the limited extent of attempts to measure and understand social exclusion empirically This key work addresses this problem employing data from a nationally representative survey of British households to quantify levels of social exclusion and the composition of the socially excluded population It also incorporates data from a European Commission funded household survey to compare social exclusion in Great Britain with eleven other countries in the European Union In the book Matt Barnes argues that social exclusion refers to enduring disadvantage on a wide range of living standards not just those that reflect economic values As well as looking at standard measures of poverty he looks at more relational measures of disadvantage such as neighbourhood discontent and social isolation in order to determine exclusion from the economic social and cultural systems that determine the integration of a person in society
