Poverty In A Dual Economy:

Poverty in a Dual Economy A. Dale Tussing,1975 *Migration, Human Capital, and Poverty in a Dual-Economy of a Developing Country* Paul R. Masson,2001-09-01 The coexistence of urban and rural poverty and migration to cities is studied in a dual economy model where the acquisition of skills is costly and involves migration to urban areas In this model both the distribution of innate abilities and the distribution of wealth matter for the migration decision and costs of backmigration may produce an urban poverty trap if unemployment lowers household wealth below the cost of skills acquisition

Macroeconomics of Climate Change in a Dualistic Economy Sevil Acar,Ebru Voyvoda,Erinc Yeldan,2018-01-25
Macroeconomics of Climate Change in a Dualistic Economy A Regional General Equilibrium Analysis generates significant genuinely novel insights about dual economies and sustainable economic growth These insights are generalize able and applicable worldwide The authors overcome existing limitations in general equilibrium modeling By concentrating on tensions between green growth and dualism they consider the global efforts against climate change and opposition by specific countries based on economic development needs Using Turkey as their primary example they address these two most discussed and difficult issues related to policy setting blazing a path for those seeking an applied economic research framework to study such economic considerations Couples a CGE climate change mitigation policy analysis with a dual economy approach Presents methods to model and assess policy instruments for mitigating climate change Provides data sets and models on a freely accessible companion website Offers a path for those seeking an applied economic research framework to study economic considerations *Affluence and Poverty in the Middle East* M. Riad El-Ghonemy,2002-09-11
Affluence and Poverty in the Middle East is an introduction to the political economy of the Middle East focusing on its most salient features persistent poverty and extreme inequality El Ghonemy analyses the factors influencing the region including its unique historical religious and cultural mix as well as its economic foundations and forms of corruption For each factor he employs case studies drawn from throughout the region from Turkey to Sudan and Morocco to Iran In the final section El Ghomeny discusses possible solutions to the challenges facing the region including possible uses of a peace dividend and the role of democracy *Inequality, Growth, and Poverty in an Era of Liberalization and Globalization* Giovanni Andrea Cornia,2004-03-18 Within country income inequality has risen since the early 1980s in most of the OECD all transitional and many developing countries More recently inequality has risen also in India and nations affected by the Asian crisis Altogether over the last twenty years inequality worsened in 70 per cent of the 73 countries analysed in this volume with the Gini index rising by over five points in half of them In several cases the Gini index follows a U shaped pattern with theturn around point located between the late 1970s and early 1990s Where the shift towards liberalization and globalization was concluded the right arm of the U stabilized at the steady state level of inequality typical of the new policy regime as observed in the UK after 1990 Mainstream theory focusing on rises in wage differentials by skill caused by either North South trade migration or

technological change poorly explains the recent rise in income inequality Likewise while the traditional causes of income polarization high land concentration unequal access to education the urban bias the curse of natural resources still account for much of cross country variation in income inequality they cannot explain its recent rise This volume suggests that the recent rise in income inequality was caused to a considerable extent by a policy driven worsening in factorial income distribution wage spread and spatial inequality In this regard the volume discusses the distributive impact of reforms in trade and financial liberalization taxation public expenditure safety nets and labour markets The volume thus represents one of the first attempts to analyse systematically the relation between policy changes inspired by liberalization and globalization and income inequality It suggests that capital account liberalization appears to have had on average the strongest disequalizing effect followed by domestic financial liberalization labour market deregulation and tax reform Trade liberalization had unclear effects while public expenditure reform often had positive effects

Poverty Strategies in Asia John Weiss, Haider Khan, 2006-01-01 the volume makes interesting reading The language of the text is indeed lucid and the organization of the materials could not have been better Arup Mitra The Developing Economies This is an important book making a convincing case that structural elements are of crucial importance in filtering the impact of growth on poverty A successful development strategy needs to address these structural elements at the country level and modify them in order to take greater advantage of the potential benefits of globalization in reducing poverty Erik Thorbecke Cornell University US This volume makes an important contribution to our understanding of the complex relationship between economic growth and poverty reduction The focus on assessing the impact of specific poverty reduction interventions at the disaggregated case study level marks an important and welcome departure from the standard approach to research in this area researchers and practitioners working in the field of poverty reduction and development in Asia and beyond will find much to interest them in this stimulating and informative volume Colin Kirkpatrick University of Manchester UK Poverty Strategies in Asia is an examination of a wide range of measures aimed at reducing poverty in the region It is widely recognized that while high and sustained economic growth is critical for poverty reduction there are other policy interventions that may also be significant in a growth plus approach to poverty reduction This volume brings together a series of case studies on the poverty impact of alternative interventions in a broad range of Asian economies The measures examined within the book cover trade liberalization both in general and in a specific market infrastructure investment particularly in roads population policies cash transfers microfinance employment guarantee programs and contract farming The countries covered include the Philippines Lao PDR Pakistan India and Thailand While the results illustrated by the contributors are mixed they demonstrate the potential for further progress in poverty reduction This latest joint publication by the ADBI and Edward Elgar Publishing will be warmly welcomed by scholars and researchers of Asian studies and development Professional economists within international and bilateral development agencies and policymakers will also find much to engage them

Migration, Human Capital, and

Poverty in a Dual-economy Model of a Developing Country Paul R. Masson, 2002 *The Economics of Poverty* Martin Ravallion, 2016 There are fewer people living in extreme poverty in the world today than 30 years ago While that is an achievement continuing progress for poor people is far from assured Inequalities in access to key resources threaten to stall growth and poverty reduction in many places The world's poorest have made only a small absolute gain over those 30 years Progress has been slow against relative poverty as judged by the standards of the country and time one lives in and a great many people in the world's emerging middle class remain vulnerable to falling back into poverty The Economics of Poverty reviews critically past and present debates on poverty spanning both rich and poor countries The book provides an accessible new synthesis of current economic thinking on key questions How is poverty measured How much poverty is there Why does poverty exist and is it inevitable What can be done to reduce poverty Can it even be eliminated The book does not assume that readers know economics already Those new to the subject get a lot of help along the way in understanding its concepts and methods Economics lives through its relevance to real world problems and here the problem of poverty is both the central focus and a vehicle for learning Monthly Labor Review, 1976 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Social Work Perspectives on Poverty** Association of Schools of Social Work in India, 1980 Proceedings Crisis, Identity and Migration in Post-Colonial Southern Africa Hangwelani Hope Magidimisha, Nene Ernest Khalema, Lovemore Chipungu, Tamuka C.
