Reformism and Revisionism in Africa's Political Economy in the 1990s T. Shaw, 1993-02-09 This timely text reevaluates the contemporary political economy of Africa in the light of continuing economic and ecological crises changing perceptions and prescriptions and transformations in global economic and strategic relations It treats hitherto overlooked issues such as gender and informal sectors and examines proliferating conditionalities such as democratic structures and military expenditures It suggests that established perspectives need to be superseded by revisionist approaches and it anticipates disappointment with current structural adjustment programmes advocating instead a return to various forms of self reliance

Hydrology and Water Resources of Africa M. Shahin, 2006-04-11 Africa the cradle of many old civilizations is the second largest world continent and the homeland of nearly one eighth of the world population Despite Africa's richness in natural resources the average income per person after excluding a few countries is the lowest all over the world and the percentage of inhabitants infected with contagious diseases is the highest Development of Africa to help accommodate the ever increasing population and secure a reasonable living standard to all inhabitants though an enormous challenge is extremely necessary Water is the artery of life without it all living creatures on earth cannot survive As such a thorough knowledge of the meteorological and hydrological processes influencing the yield and quality of the water resources surface and subsurface and their distribution and variability in time and space is unavoidable for the overall development of any part of the world It is highly probable that the said knowledge is at present a top priority to Africa a continent that has been for so long and probably still devastated by the endless ambitions of colonial powers not to forget the corruption and destruction practiced by the internal powers at least in some countries The present book Hydrology and Water Resources of Africa is written with the aim of bringing together in one volume a fair amount of knowledge any professional involved in hydrology and water resources of Africa needs to know

Africa After the Cold War Adebayo Oyejide, Abiodun Alao, 1998 Although it is widely recognised that Africa's security problems are acute it has never been a subject of much intellectual inquiry This lack of scholarly discourse on the many dimensions of the problems of African security is the major consideration of this book The approach to the questions of security differ markedly from the traditional approach that gives primacy to the threat of military aggression as sole factor in state security A departure must be made from this dominant preoccupation in a new global order that has seen profound changes

The Migration Experience in Africa Jonathan Baker, Tade Akin Aina, 1995 South Africa by Christian M Rogerson

Non-governmental Organizations (NGOs) and Sustainable Development in Sub-Saharan Africa Robert A. Dibia, 2008-01-01 Written to provide guidance for civil society organizations and their client groups this book examines the role of NGOs in the development processes on the African continent It raises questions about the influence of funding agencies over the NGOs they support and explores the challenges NGOs face The book argues that increased knowledge and cooperation on all parts is essential to achieve sustainable development This book also concludes that sustainable development activities are not beneficial to every community in Africa Taking into consideration globalization and studies of sub Saharan countries this book concludes that new models of leadership are necessary for the success of Africa and NGOs are a vital part of achieving that development

The Horn of Africa Peter Woodward, 1996-12-31 Nowhere is the crumbling of state structures more self evident than in Somalia the Sudan and Ethiopia Drawing on a wide range of little known material this book presents an overview of structural disintegration in the Horn of Africa from the dual perspectives of domestic and international political developments The breakdown of these three major states is due according to Woodward to the ravages of civil war He argues that while all three conflicts arise from domestic issues their scale has been magnified by international involvement which has also linked the three countries together with Ethiopia as the crux The Horn of Africa is a study of the national and international dimensions of these conflicts examining not only the relations between the three countries but also their relations with a variety of regional actors as well as with the superpowers *Contemporary Development Issues in Nigeria* Olayinka Akanle, A.O. Olutayo, A.O. Omobowale, 2015-04-01 Africa today confronts and is known for daunting developmental challenges despite the abundant human and material resources and significant global development assistance A number of issues have been identified as causes of the continent's poor development performance However a number of these implicated issues have been insufficiently unaccounted for and the majority of existing analysis on them is too generic and misinformed Against this background this book uses Nigeria as an example to contribute knowledge and informed research to the wider African continent Nigeria is the most populous nation in Africa and is one of the continent's most resource endowed countries but despite this it is one of the poorest countries in the entire world While many studies have examined the country in depth its continued development complications and its paradoxical status on the world stage suggest that there is still a need to better understand the country Even though the issues of Nigeria are engaged with directly in this book the findings have implications and relevance for the rest of the continent and many other developing countries in general As such this book will be of particular interest to all development students scholars practitioners and policy makers especially those interested in the sustainable development of Africa both now and in the future Africa Air University (U.S.). Library, 1993 *Interdisciplinary Approaches to the Future of Africa and Policy Development* Tshabangu, Icarbord, 2022-03-11 Despite several idealistic efforts towards a united Africa the term remains a hypothetical concept symbolizing a desired federal state on the continent While globalization and interconnectedness have brought prosperity in some parts of the world Africa has not generally benefited from global decisions These decisions policies and practices have tended to be wholly influenced by the rich and powerful countries and their transnational agencies and corporations in pursuit of their national interests Faced with such enormous external economic and political forces the divided and powerless African states have been unable to bargain for lucrative economic deals or pursue national interests for the benefit of their people hence the need to examine what exists in varied fields and the emerging trends for the future *Interdisciplinary Approaches to the Future of Africa and Policy Development* addresses critical issues and challenges in Africa and seeks to examine and understand the future trends in Africa through a deconstructive interrogation of present trends Covering a wide

range of topics such as sustainability equality and democracy it is ideal for researchers academicians students economists policymakers political parties trade unions and NGOs
