Fernandez, 2018-12-14 First published in 1997 this was the first Autonomist Marxist book on the USSR The various theories of Soviet capitalism are considered more comprehensively than in any previous work and are shown to be inadequate insofar as they fail to demonstrate satisfactorily the predominance of the category of capital A powerful new theory is developed which does precisely this introducing the concepts of bureaucratic forms of both exchange value and money This constitutes an important contribution to the overall theoretical critique of capital Attention is then turned to the class struggle For the first time the various Marxist theories of the USSR are systematically considered in relation to what they say about the working class and its struggle

Stephen Wegren,2010-11-23 Winner 1999 Edward A Hewett Book Prize from AAASS A comprehensive original and
innovative analysis of the social economic and political factors affecting contemporary Russian reform the book is organized
around the central question of the role of the state and its effect on the course of Russian agrarian reform In the wake of the
collapse of the USSR contemporary conventional wisdom holds the the Russian state is weak Stephen Wegren feels that the
traditional approach to the weak strong state suffers from measurement and circular logic problems believing that the
Russian state thought weaker than in its Soviet past is still relatively stronger than other actors The state s strength allows it
to intervene in the rural sector in ways that other power contender cannot Specifically as a measure of state intervention
Wegren analyzes how the state has influenced urban rural relations rural rural relations and the nonstate private agricultural
sector Several dilemmas arose that have complicated successful agrarian reform as a result of the nature of state
interventions how reform policies were defined and the incentives rhar arose from state sponsored policies During
contemporary Russian agrarian reform urban rural differences have widened marked by a deterioration in rural standards of
living and increased alienation of rural political groups from urban alliances At the same time within the rural sector reform
failed to reverse rural egalitarianism In addition the nature of state interventions has undermined attempts to create a
vibrant productive private rural sector based on private farming Wegren s research is based upon extensive field work
interviews archival documents and published and unpublished source material conducted over a six year period and he
demonstrates the link between agrarian reform and the success of overall reform in Russia This learned and often
controversial volume will interest political scientists policy makers and scholars and students of contemporary Russia

Constitutional Crisis Robert Sharlet,2016-06-16 Moving from the adoption of the post Stalin Constitution of 1977 through
its subsequent implementation under Brezhnev Andropov and Chernenko to the radical legal restructuring of the Gorbachev
years Robert Sharlet traces the gradual evolution of a nascent constitutionalism in the erstwhile USSR Sharlet a noted

authority on Soviet law and constitutional development demonstrates the gradual transformation of law from an instrument of Communist Party rule into the new rules of the game for nonauthoritarian political development In effect he argues one of Gorbachev s most durable achievements may be his redefinition of Soviet politics into a legal idiom along with his relocation of policymaking from behind the closed doors of Party conclaves into the more open emergent arena of constitutional government In analyzing the politics of law from the Brezhnev era to the rise of Yeltsin the author takes account of the war of laws the symbolic uses of the Soviet constitution and even the fact that the leaders of the failed coup attempted to justify their seizure of power on constitutional grounds Constitutionalism has sufficiently suffused Soviet public life the book concludes that most of the sovereign republics as successors to the former USSR have begun designing their futures to varying degrees in constitutional forms

Factory and Community in Stalin's Russia Kenneth M. Straus,2010-11-23 Kenneth Straus weaves together many threads in Russian social history to develop a new theory of working class formation in the years of Stalin s First Five Year Plan In so doing he addresses a long standing debate among historians by suggesting new answers to an old question Was there social support for the Stalin regime among the Soviet working class during the 1930s and if so why Straus argues that the keys for interpreting Stalinism lie in occupational specialization on the one hand and community organization on the other He focuses on the daily life of the new Soviet workers in the factory and community arguing that the most significant new trends saw peasants becoming open hearth steel workers housewives becoming auto assembly line workers and machine operatives and

youth training en masse rather than occupations categories in the vocational schools in the factories the FZU Tapping archival material only recently available and a wealth of published sources Straus presents Soviet social history within a new analytical framework suggesting that Stalinist forced industrialization and Soviet proletarianization is best understood within a comparative European framework in which the theories of Marx Durkheim and Weber best elucidate both the broad similarities with Western trends and the striking exceptional aspects of the Soviet experience **Beyond Sovietology**
