**The Philippines' Comprehensive Agrarian Reform Program** Elpidio L. Morales,1990      **Economics and Business in the Philippines** ,1994      *Poverty in the Philippines* Karin Schelzig,2005 The report is based on a multi dimensional approach to poverty following ADB s poverty reduction strategy which defines poverty as a deprivation of essential assets The analytical framework of the country poverty analysis blends a more traditional analysis of income poverty with an assessment of access to five different types of assets Taken from the sustainable livelihoods approach these assets are human physical natural financial and social capital      **Philippine Sociological Review** ,1973      **Ethnic Conflicts in Southeast Asia** Kusuma Snitwongse,Willard Scott Thompson,2005 Potentially destabilizing ethnic conflicts continue to challenge nation states worldwide The countries of Southeast Asia are no exception Globalization population movements and historical and political fault lines in a tremendously ethnically diverse region coupled with continuing uneven access to economic development have seen the resurgence of old conflicts or the flaring up of new ones Along with violence and the loss of life and livelihood there are also longer term cross border impacts to consider in the form of refugees or displaced persons illegal migrant labour as well as drug and arms smuggling Written by country experts this volume examines ethnic configurations as well as conflict avoidance and resolution in five Southeast Asian countries Indonesia Malaysia Myanmar the Philippines and Thailand Ethnic Conflicts in Southeast Asia is a resource for scholars policy makers NGO personnel analysts and others who wish to deepen their understanding of the region or develop strategies to prevent modulate and resolve such conflicts

**Asian Drama; an Inquiry Into the Poverty of Nations** Gunnar Myrdal,1968      **Asian Transformations** Deepak Nayyar,2019 Including in depth contributions by eminent economists and social scientists Asian Transformations examines the phenomenal changes transforming economies in this continent and shifting the balance of economic power in the world while reflecting on the future prospects in Asia over the next twenty five years      **Hey Wait, I'm Not Yet Through!** Beth Day Romulo,1999      **Philippines** Dante B. Canlas,2007      Overpopulated Philippines Armando Ang,2009 The Philippines is under assault not from outside source but from within Many are aware of the problem but can do little about it Even if they wanted to do something about it it is aggravated but those who do not think it is a problem The assault is coming from our runaway population explosion There is more than just the vast number of people in the issue of overpopulation Many pro lifers in the country do not seems to grasp the issue of overpopulation in relation to factors such as the quality of life nutritious food education pollution deforestation population density traffic problem crimes unemployment and poverty health etc Most of them are blind to the suffering of the poor who takes the blunt of the problem because they probably never experienced their kind of hardship and quality of life Increasing population naturally entails the need for more of almost everything just to maintain our lifestyle albeit in many low quality for most of the people surviving now We need more classrooms and teachers for the children and we cannot seem to lick both problems after all these decades because of the

exploding population growth In a stabilized population there will no longer be need for new classrooms and funds could be channel to improving the education system and getting more children to finish higher education The basic services such as water supply and health services have been inadequate and will continue to plague us in the coming decades There is not enough clean water to supply even all the inhabitants of the metropolis Many have to pump up their water need from deep wells that are often contaminated while causing the sinking of the land above in many areas Public health clinics and hospitals are often crowded with patients and many are dying for lack of medicines The shelves in the supermarket may be full but most of the poor do not have the money to buy their basic needs According to one latest survey nine millions people are surviving below 1 a day Even more numbers are surviving below 2 a day Not only that they are not getting adequately the basic food necessities such as protein that would allow them to compete in this world Protein is essential for children if they want to develop their brains and improve their IQ Are we going to continue to export our workers like slaves to other countries Many of our countrymen are working abroad to earn a decent life for their family back home Most of these jobs are unwanted by the locals Some of them could be demeaning and often hard works There is a serious unemployment and underemployment problems in the country forcing them to look for jobs elsewhere There is a need to balance the available jobs against the number of young people joining the workforce every year Too many people out of work could mean more crimes as they tried to feed themselves and their families The excessive labor force allows employers to mistreat employees on a hire fire hire basis Many workers have been hired on a contractual work even for simple jobs The female workers are particularly at a disadvantage Some have been forced to work on a commission basis selling cigarettes and candies whose commissions do not add up to half the basic salary mandated by law while others are not even given any commission unless they reach a certain quota This wanton practice is possible only because there are too many unemployed workers in a finite labor market In fact many of them are willing to work for pittance just to fill their stomachs and that of their loved ones
