✓ Exclusively available on IvyPanda

Even though cities are considered centers of modern political, cultural, and social life, many people still live in rural areas. According to The World Bank (no date) information, the percentage of the rural population keeps declining with every passing year. In particular, this value decreased from over 66% in 1960 to slightly more than 43% in 2020 (The World Bank, no date). As the United Nations (2018, para. 7) explains, "the global rural population is now close to 3.4 billion and is expected to rise slightly and then decline to 3.1 billion by 2050." This information means that many people live in the country worldwide.

The percentage of the rural population is lower for developed countries, including the United States and the United Kingdom. For example, the US Department of Agriculture (2021, para. 5) admits that 46 million US citizens lived in rural areas in 2017, which is slightly more than approximately 15% of the country's total population. Simultaneously, 9.7 million people (close to 17% of the state's population) live in rural regions in the United Kingdom (Department for Environment, Food, & Rural Affairs, 2021, para. 7). This information demonstrates that many people live in the village, meaning that they represent a significant research object.

Research Objective and Questions

The given proposal focuses on the issue that rural areas are insufficiently developed. Abreu and Mesias (2020, p. 578), as well as Veronika and Mónica (2020, p. 530), highlight the countryside's more mediocre financial state. Simultaneously, Lowe *et al.* (2019, p. 30) and Mukti *et al.* (2021, p. 1) comment on inefficiencies in the development of knowledge and expertise in rural regions. Thus, the objective of the proposal is to determine how the inhabitants of the country in the United Kingdom assess rural development from an economic point of view.

The research project is going to answer a few essential questions that are presented below:

The Economics of Poverty Martin Ravallion, 2016 There are fewer people living in extreme poverty in the world today than 30 years ago While that is an achievement continuing progress for poor people is far from assured Inequalities in access to key resources threaten to stall growth and poverty reduction in many places The world s poorest have made only a small absolute gain over those 30 years Progress has been slow against relative poverty as judged by the standards of the country and time one lives in and a great many people in the world s emerging middle class remain vulnerable to falling back into poverty The Economics of Poverty reviews critically past and present debates on poverty spanning both rich and poor countries The book provides an accessible new synthesis of current economic thinking on key questions How is poverty measured How much poverty is there Why does poverty exist and is it inevitable What can be done to reduce poverty Can it even be eliminated The book does not assume that readers know

economics already Those new to the subject get a lot of help along the way in understanding its concepts and methods Economics lives through its relevance to real world problems and here the problem of poverty is both the central focus and a vehicle for learning

African Economic Development Emmanuel Nnadozie,Afeikhena Jerome,2019-05-08 In a sweeping survey of African economies leading scholars offer the latest research into the biggest current influences on African growth and development taking account of relevant institutional contexts as well as significant or unique problems that have slowed Africa s progress

Women, Activism and Apartheid South Africa Bev Orton,2018-10-05 This book investigates women s political activism and conflict in the struggle against apartheid in South Africa using play texts alongside interviews with female playwrights and women who worked within the theatre to examine issues around domestic violence racial abuse and women in detention without trial

Climate Action in Southern Africa Philani Moyo,2023-10-27 Using climate justice as an analytical tool this volume examines the role of local mitigation and adaptation actions in Southern Africa in furthering climate resilient development Climate Action in Southern Africa examines the intrinsic connection between local climate actions climate resilient development and strides towards a just transition The theoretical grounding in climate justice allows the authors to analyse whether current climate actions in Africa are truly effective for the poor and marginalised whose lives and livelihoods are impacted by a climate crisis largely not of their making The authors also question the extent to which pathways to net zero carbon emissions by 2050 are achievable in Africa and ask whether this can be attained without undermining livelihoods and human development Overall this book argues that for any transition to be a just transition it has to be aligned with the pursuit of sustainable development and climate justice for current and future generations on the African continent Drawing out key factors including politics gender and migration this volume will be of great interest to students and scholars of climate change climate justice and African development

China's Disappearing Countryside Yongjun Zhao,2016-05-23 While China s hybrid rural land tenure system has contributed to agricultural development it is interwoven with rising farmland loss and social conflicts This book examines the linkages between land tenure development and governance in the context of China s development transformation Drawing on empirical studies it advocates the exploration of innovative land tenure systems that address the wider determinants institutions power politics and social development It argues that a land tenure system can only be sustainable when it is compatible with the overall biophysical social political and economic conditions This new institutional lens into the conditions and dynamics of land tenure systems marks a paradigm shift away from those focusing on the narrow meaning of land rights and tenure security strengthening as these approaches can paradoxically contribute to weaker land and resource governance Contributing to an enhanced understanding of the challenges China faces in agricultural development and natural resource governance and to the international debates on land tenure reform this book will be of interest to researchers practitioners policy makers and students in development studies anthropology sociology political sciences law geography economics public administration

and other relevant disciplines The lessons learnt from China also shed light on its global engagement on sustainable development and governance issues
