Poverty Reduction In East Asia:

Poverty Reduction in East Asia Frida Johansen, 1993 **Social Policy and Poverty in East Asia** James Midgley, Kwong Leung Tang, 2009-09-11 This book looks at the role of social policy and particularly social security in addressing the ongoing challenge of poverty in East Asia despite the region's spectacular experience of economic growth in recent decades. The East Asian miracle resulted over the last four decades in a transformation of the region's traditional agrarian economies and significant increases in standards of living for many ordinary people. Even though it was given little attention, poverty has remained an ongoing problem. The problem became particularly evident however with the Asian financial crisis of 1997 when many low income and middle class workers became unemployed. As a result of this crisis the need for effective social policies and social security programs were recognized. The idea that economic growth would solve the problem of poverty was increasingly challenged. Even in China today where rapid growth has created new employment opportunities and the promise of prosperity for many, the government has recognized that the problem of poverty cannot be addressed only through economic growth but that comprehensive social policies must be formulated and this includes the development of an effective security system. **Social Protection and Labor at the World Bank, 2000-08** Robert Holzmann, 2009 Social Protection Labor at the World Bank 2000 2008 presents a progress review of the sector strategy by the World Bank published in early 2001. The strategy proposed a new conceptual framework: OCoSocial Risk ManagementOCoto review and reform existing interventions and propose new ones that better assist vulnerable people in addressing the many risks to which they are exposed. **Economic Growth and Poverty Reduction in Asia** Harry Tatsumi Oshima, 1994 **Welfare and Inequality in Marketizing East Asia** Jonathan D. London, 2018-03-20 The world scale expansion of markets and market relations ranks among the most transformative developments of our times. We can refer to this process by way of a generic if inelegant term: marketization. This book explores how processes of marketization have registered across East Asia's diverse social landscape and its implications for patterns of welfare and inequality. While there has been great interest in East Asia's economic rise, treatments of welfare and inequality in the region have been largely relegated to specialist literatures. Proceeding from a synthetic critique of political economy, this book places welfare and inequality at the center of a more encompassing comparative approach to political economy that construes countries as dynamic globally embedded social orders defined and animated by distinctive social relational and institutional features. *Human Rights of Minority and Women's: Reinventing women's right* Indrani Sen Gupta, **Asia's Quest for Inclusive Growth Revisited** Ms. Chie Aoyagi, Mr. Giovanni Ganelli, 2015-02-26 Despite the rapid economic growth and poverty reduction, inequality in Asia worsened during last two decades. We focus on the determinants of growth inclusiveness and suggest options for reform. A cross-country empirical analysis suggests that fiscal redistribution, monetary policy aimed at macro stability and structural reforms to stimulate trade, reduce unemployment and increase productivity are important.

determinants of inclusive growth The main policy implication of our analysis is that there is still room to strengthen such policies in Asia to better achieve growth with shared prosperity In particular scenario simulations based on our results suggests that the effect of expanding fiscal redistribution on inclusive growth could be sizeable in emerging Asia since the estimated improvement in our proxy of inclusive growth a measure of growth in average income corrected for the equity impact ranges from about 1 to about 8 percentage points

Food Security and Poverty in Asia and the Pacific Asian Development Bank, 2012-04-01 Ensuring a secure supply of food is essential given the world's and especially Asia's growing population high and volatile food prices increasingly scarce resources and changing environment This publication discusses the drivers behind food insecurity in Asia and points to ways to mitigate it
