Power And Crisis In The City Corporations Unions And Urban Policy:

Power and Crisis in the City Roger Friedland, 1982 Nuclear Power and Social Power Rick Eckstein, 1997 We often think of progress and economic growth as natural developments that benefit various members of society This title challenges this view and instead suggests that specific definitions of progress and economic growth can be molded by powerful individuals organizations and classes **Black Politics and Urban Crisis in Britain** Brian D. Jacobs, 1986-06-19 This book considers the nature of the black constituency in Britain s inner cities **Reagan and the Cities** George E. Peterson, Carol Weiss Lewis, 1986 Powers of Theory Robert R. Alford, Roger Friedland, 1985-10-31 An evaluation of different theories of the nature of the state in capitalist democracies **The State and the City** Ted Robert Gurr, Desmond King, 1987-08-27 Many of the oldest and largest Western cities today are undergoing massive economic decline The State and the City deals with a key issue in the political economy of cities the role of the state Ted Robert Gurr and Desmond S King argue that theoreticians from both the left and the right have underestimated the significance of state action for cities Grounding theory in empirical evidence they argue that policies of the local and national state have a major impact on urban well being Gurr and King s analysis assumes modern states have their own interests institutional momentum and the capacity to act with relative autonomy Their historically based analysis begins with an account of the evolution of the Western state s interest in the viability of cities since the industrial revolution Their argument extends to the local level examining the nature of the local state and its autonomy from national political and economic forces Using cross national evidence Gurr and King examine specific problems of urban policy in the United States and Britain In the United States for example they show how the dramatic increases in federal assistance to cities in the 1930s and the 1960s were made in response to urban crises which simultaneously threatened national interests and offered opportunities for federal expansion of power As a result national and local states now play significant material and regulatory roles that can have as much impact on cities as all private economic activities A comparative analysis of thirteen American cities reflects the range and impact of the state s activities at the urban level Boston they argue has become the archetypical postindustrial public city half of its population and personal income are directly dependent on government spending While Gurr and King are careful to delineate the limits to the extent and effectiveness of state intervention they conclude that these limits are much broader than formerly thought Ultimately their evidence suggests that the continued decline of most of the old industrial cities is the result of public decisions to allow their economic fate to be determined in the private sector *Privatism and Urban Policy in Britain and the United States* Timothy Kiel Barnekov, Robin Boyle, Daniel Rich, 1989 Demonstrating how cities in the United Kingdom appear to be following the American patterns of urban policy even as far as the language used this book compares urban policy and programs in both countries The authors show that the parallels between these two approaches rest on the market oriented small government political foundations of both countries but that these political similarities obscure significant differences which

will make transatlantic urban policy and program transfer more difficult **Henry Ford's Plan for the American Suburb** Heather Barrow, 2018-10-29 Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city's border in Dearborn but also was the first industrialist to make the automobile a mass consumer item. So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users. A welfare capitalist Ford was a leader on many fronts: he raised wages, increased leisure time, and transformed workers into consumers, and he was the most effective at making suburbs an intrinsic part of American life. The decade was dominated by this new political economy, also known as Fordism, linking mass production and consumption. The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well. Ultimately, Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs, shifting away from central cities. Mass suburbanization was a national phenomenon. Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere. Suburbanization, however, was never a simple matter of outlying communities growing in parallel with cities. Instead, resources were diverted from central cities as they were transferred to the suburbs. The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream, and if so, by whom, and at what cost. This book will appeal to those interested in cities and suburbs, American studies, technology and society, political economy, working class culture, welfare state systems, transportation, race relations, and business management **The New Labor Radicalism and New York City's Garment Industry** Leigh David Benin, 2019-02-21 First published in 2000. This study examines how Progressive Labor, an antirevisionist offshoot of the Communist Party USA, attempted to revolutionize the labor front in New York City's garment industry during the 1960s. An ideologically driven group whose founders were loyal to Stalinism and attracted by Maoism, Progressive Labor set out in 1962 to become the vanguard of the American working class **Racism and Equal Opportunity Policies in the 1980s** Richard Jenkins, John Solomos, 1989 This edition, first published in 1989, looks at the problems of racism and equal opportunity in employment and government policies towards them in Britain. It brings together a group of specialist contributors and covers the major areas of debate, including the law, policies towards unemployment, job training, and the labour market; the role of the public and private sectors; the role of trade unions; the gap between policies and pronouncements on equal opportunity and their implementation; and the related issue of sectarian discrimination in Northern Ireland. It looks at the future prospects for equal opportunities and provides conclusions for policy. In particular, it aims to address important topics such as the assumptions underlying policies and whether they realistically reflect reality, the actual effect of legislation, and the relationship between power disparities in society as a whole and racial inequality **Fractured Cities** Brian D. Jacobs, 2003-09-02 Anglo-American cities face economic decline, social polarisation, and racial conflict. Their fate is increasingly decided by the global actions of transnational corporations and market forces. Community groups find it difficult

to gain access to the political system Ethnic minorities strive for empowerment while indebted city governments battle to maintain basic services Such is the urban crisis of the 1990s *Fractured Cities* describes the political economy of urban change and explores the future of the city **Urban Social Movements in Jerusalem** Shlomo Hasson,2012-02-01 Hasson explores the development of eight urban protest organizations in Israel revealing how social deprivation is transformed into organized patterns of activity To investigate how and why urban movements evolve he depicts the housing and social conditions in which members of Jerusalem s second generation found themselves He follows their trajectories analyzes the process of organization building and the formation of urban social movements the conflict between charismatic protest powers and the state the routinization of charisma He also traces the critical response of the state to these processes

Pacific Rim Cities in the World Economy Michael P. Smith,1989-01-01 *Pacific Rim Cities in the World Economy* The Sustaining Hand Bryan D. Jones,Lynn W. Bachelor,1993 The New Urban Paradigm Joe R. Feagin,1998 His assessment of the historical conditions and institutions that protect class and racial privileges makes it clear why people in cities rebel and why social scientists should focus future research on large scale urban transformation **Poverty, Ethnicity and the American City, 1840-1925** David Ward,1989-02-24 David Ward examines the geographical relationship between migrants and the inner city and the creation of slums and ghettos **The Uncertain Future of the Urban Core** Christopher M. Law,2017-10-12 Originally published in 1988 Inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups Only offices and tourism offer some prospects of growth but these vary in their potential from one city to another This book assesses changes in the structure of urban areas concentrating on the process of decentralisation and the consequences for the inner city and city centre It examines and evaluates policies and makes suggestions for the future management of the city **Partnerships in Urban Governance** Jon Pierre,2016-07-27 These essays explore the utility of thinking about public private partnerships for local economic development A theoretical examination of theories of governance institutions and policy instruments is supplemented by empirical analysis and comparisons of their operation in the United Kingdom Sweden and the United States in the context of debates about the limits of politics and dependence on the institutions of civil society **Accounting for Public Policy** David Rosenberg,1989 **American Studies** Jack Salzman,American Studies Association,1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988
