Adaptive Filtering Under Minimum Mean p-Power Error Criterion Wentao Ma,Badong Chen,2024-05-31 Adaptive filtering still receives attention in engineering as the use of

the adaptive filter provides improved performance over the use of a fixed filter under the time varying and unknown statistics environments This application evolved communications signal processing seismology mechanical design and control engineering The most popular optimization criterion in adaptive filtering is the well known minimum mean square error MMSE criterion which is however only optimal when the signals involved are Gaussian distributed Therefore many optimal solutions under MMSE are not optimal As an extension of the traditional MMSE the minimum mean p power error MMPE criterion has shown superior performance in many applications of adaptive filtering This book aims to provide a comprehensive introduction of the MMPE and related adaptive filtering algorithms which will become an important reference for researchers and practitioners in this application area The book is geared to senior undergraduates with a basic understanding of linear algebra and statistics graduate students or practitioners with experience in adaptive signal processing

Key Features Provides a systematic description of the MMPE criterion Many adaptive filtering algorithms under MMPE including linear and nonlinear filters will be introduced Extensive illustrative examples are included to demonstrate the results
