Professional Practices Tony Becher, 2018-04-17 There is recurrent public concern with enhancing the quality of professional performance What is the contemporary understanding of professionalism Are the needs of professionals in various fields being met in today's world as what is commonly called continuing professional development has become of a sizable industry Many books treat the professions as a homogeneous group and view them from an external standpoint In *Professional Practices* Tony Becher investigates the differences as well as the similarities between and within professional groupings and presents the perspectives of insiders One particular theme concerns the main patterns of change in professional careers and the specific problems faced by women professionals in a largely male dominated environment Brilliantly written the book focuses on six professions medicine pharmacy law accountancy architecture and structural engineering The material is based on 190 interviews with a variety of members of the six professions Becher's book offers original and sensitive insight into the working lives of practitioners and an understanding of the ideas and values they

embrace He argues that their high sense of commitment stems from a concern to enhance their individual reputations and to maintain their collective professional status Becher highlights the variety of activities in which these professionals are engaged and the reasons for their responses to social and political pressures from outside their fields Above all he seeks to demystify professionalism and to show that professional people share with others a wide range of universal human feelings and concerns A postscript raises the issue of why Diversities are little involved with continuing education in the professions Practicing professionals will benefit from this insight into how people in their own and other professions cope with similar problems Becher's volume will be particularly appealing to educationists policymakers and social scientists interested in the subject of professionalism those involved in the provision of initial and mid career change for the professions and those with a lay interest in the topic

Evaluation and Accountability in Clinical Training E. Berler, Barry A. Edelstein, 2013-11-11 Accountability in clinical training implies a strong relationship between the training outcomes touted by a training program and the performance of its graduates The training program and its faculty must be able to ensure that students have the competencies necessary for entering the profession and can offer competent services In addition responsibility for the quality and value of training must be assumed by the profession Pressure for accountability is becoming increasingly apparent as the public learns about fraud waste and abuse in publicly funded programs Fishman Neigher 1982 Federally supported clinical training programs have had to defend their training practices against threats of funding loss without the hard data needed to support their practices Funding seems to have been forthcoming mostly because of our ability to demonstrate the need for clinical counseling and school psychologists Graduates seeking professional careers in such applied fields demand considerable trust from their clientele and the public at large when they establish themselves offer and advertise their services make claims on public monies and profess to do good and no harm Neither their clientele nor the public are in the position to evaluate the services of the profession or the claims made for these American Psychological Association IAPA 1982 p
