**Widening the World of International Relations** Ersel Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just meta theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory

**The Everyday Cold War** Chi-kwan Mark, 2017-10-05 In 1950 the British government accorded diplomatic recognition to the newly founded People s

Republic of China But it took 22 years for Britain to establish full diplomatic relations with China How far was Britain's China policy a failure until 1972 This book argues that Britain and China were involved in the everyday Cold War or a continuous process of contestation and cooperation that allowed them to normalize their confrontation in the absence of full diplomatic relations From Vietnam and Taiwan to the mainland and Hong Kong China's everyday Cold War against Britain was marked by diplomatic ritual propaganda rhetoric and symbolic gestures Rather than pursuing a failed policy of appeasement British decision makers and diplomats regarded engagement or negotiation with China as the best way of fighting the everyday Cold War Based on extensive British and Chinese archival sources this book examines not only the high politics of Anglo Chinese relations but also how the British diplomats experienced the Cold War at the local level

*New Perspectives on the End of the Cold War* Bernhard Blumenau, Jussi M. Hanhimäki, Barbara Zanchetta, 2018-02-02 This collection of essays makes a significant contribution to the historiography of the end of the Cold War Research on the causes and consequences of the end of the Cold War is constantly growing Initially it was dominated by fairly simplistic and often politically motivated debates revolving around the role played by major winners and losers This volume addresses a number of diverse issues and seeks to challenge several common wisdoms about the end of the Cold War Together the contributions provide insights on the role of personalities as well as the impact of transnational movements and forces on the unexpected political transformations of the late 1980s and early 1990s Geographically the chapters largely focus on the United States Europe with special emphasis on Germany and the Soviet Union The individual chapters are drawn together by the overarching theme relating to a particular common wisdom were the transformations that occurred truly unexpected This collection of essays will make an important contribution to the

growing literature on the developments that produced the collapse of the Iron Curtain the demise of the Soviet Union and the end of the Cold War This volume will be of much interest to students of Cold War Studies International History European Politics and International Relations in general **Power and Influence After the Cold War** Ann L. Phillips, 2000

Challenging conventional wisdom about German dominance in the new Europe this study presents a new approach to the question of power and influence after the Cold War Inspired by the debate over German hegemony and drawing on intensive fieldwork Ann L Phillips develops two original cases of German relations with East Central Europe to test competing arguments As she convincingly demonstrates the politics of reconciliation and the activities of German party affiliated foundations illustrate German engagement in the region in its dual faces restraint and projection The author uses the less developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other Contributing to the theoretical debate Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo realist or liberal approaches could not The author s fresh perspective and new evidence demonstrate that East Central European states play a much greater role in the influence equation than they did in the past Reinterpreting the End of the Cold War Silvio Pons, Federico

Romero, 2014-08-28 As the activities of individuals organizations and nations increasingly occur in cyberspace the security of those activities is becoming a growing concern Political economic and military leaders must manage and reduce the level of risk associated with threats from hostile states malevolent nonstate actors such as organized terrorist groups or individual hackers and high tech accidents The impact of the information technology revolution on warfare global stability governance and even the meaning of existing security constructs like deterrence is significant These essays examine the ways in which the information technology revolution has affected the logic of deterrence and crisis management definitions of peace and war democratic constraints on conflict the conduct of and military organization for war and the growing role of the private sector in providing security This book was previously published as a special issue of the journal Contemporary Security Policy

War Powers Mariah Zeisberg, 2015-09-01 Armed interventions in Libya Haiti Iraq Vietnam and Korea challenged the US president and Congress with a core question of constitutional interpretation does the president or Congress have constitutional authority to take the country to war War Powers argues that the Constitution doesn t offer a single legal answer to that question But its structure and values indicate a vision of a well functioning constitutional politics one that enables the branches of government themselves to generate good answers to this question for the circumstances of their own times Mariah Zeisberg shows that what matters is not that the branches enact the same constitutional settlement for all conditions but instead how well they bring their distinctive governing capacities to bear on their interpretive work in context Because the branches legitimately approach constitutional questions in different ways interpretive conflicts between them

can sometimes indicate a successful rather than deficient interpretive politics Zeisberg argues for a set of distinctive constitutional standards for evaluating the branches and their relationship to one another and she demonstrates how observers and officials can use those standards to evaluate the branches constitutional politics With cases ranging from the Mexican War and World War II to the Cold War Cuban Missile Crisis and Iran Contra scandal War Powers reinterprets central controversies of war powers scholarship and advances a new way of evaluating the constitutional behavior of officials outside of the judiciary

**The New Cold War and the Remaking of Regions** James McGill Professor of International Relations T V Paul, T. V. Paul, Markus Kornprobst, 2025 This book argues that the world entered a new cold war when Russia invaded Ukraine in 2022 While the United States and its allies are in competition with China Russia and their allies this new cold war is far different from the old cold war The New Cold War and the Remaking of Regions shows how this new competition will be multipolar and multiplex not a world separated into rigid blocs Rather secondary powers small states and even non state actors will pragmatically pick and choose when their interests intersect with the great powers preserving their flexibility and influence The new cold war will play out in regional competitions that may lead to either peaceful change or conflict but it will also vary from region to region and across sectors such as the tech economy This volume contributes to the study of regionalism in international relations and is part of a new wave of scholarship that changes the focus of international relations from great powers alone to a recognition of the agency of others Contributors address the new cold war and regional ordering processes through different theoretical perspectives realist liberal constructivist and critical approaches

International Relations Since 1945 John W. **The Great Power (mis)Management** Alexander Astrov, 2016-03-03 Drawing on the empirical case of the Russian Georgian war of 2008 the book explores the theoretical underpinnings of the idea of great power management first articulated within the English School of International Relations The contributors to the volume approach this idea from a variety of theoretical perspectives ranging from policy analysis to critical theory but all of them are addressing the same question What does the Russian Georgian war of 2008 tell us about great power management as an institution of international society

**The Cold War and After** Richard Saull, 2007-01-20 The Cold War is often presented as an international power struggle between the Soviet Union and the US Richard Saull challenges this assumption He broadens our understanding of the defining political conflict of the twentieth century by stressing the social and ideological differences of the superpowers and how these differences conditioned their international behaviour Saull argues that US Soviet antagonism was part of a wider conflict between capitalism and communism involving states and social forces other than the superpowers The US was committed to containing revolutionary and communist movements that emerged out of

uneven capitalist development In highlighting the socio economic and ideological dimensions of the Cold War Saull not only provides a richer history of the Cold War than mainstream approaches but is also able to explain why revolutionary domestic transformations caused international crises Tracing the origins of new resistance to American global power Saull s book provides an ideal alternative perspective on the Cold War and its end      *Globalization, Multipolarity and Great Power Competition* Hanna Samir Kassab,2022-07-15 In his new book Hanna Samir Kassab examines changes and trends in international politics and the competition between great powers for control of the international system He argues that the increase in geopolitical economic nationalist and resource competition between three great powers the United States China and Russia points to the changing structure of the international system This competition is a systemic one focusing more on the rules and norms that defined the system since the end of the Cold War This American led unipolar order is translating into a multipolar one Kassab begins by tracing the decline of the United States after the Iraq War 2003 and the Great Recession 2008 as well as the rise of China and the resurgence of Russia He describes major foreign policy changes from George H W Bush to Donald J Trump and how the various administrations approached the international system Russia and China will increase their international influence as the United States pulls back from the international system Written using simple jargon *Globalization Multipolarity and Great Power Competition* is equally accessible to academics and casual readers and laypeople interested in international politics      *The Oxford Handbook of the Cold War* Richard H. Immerman,Petra Goedde,2013-01-31 The Oxford Handbook of the Cold War offers a broad reassessment of the period war based on new conceptual frameworks developed in the field of international history Nearing the 25th anniversary of its end the cold war now emerges as a distinct period in twentieth century history yet one which should be evaluated within the broader context of global political economic social and cultural developments The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research The individual chapters in this volume evaluate both the extent and the limits of the cold war s reach in world history They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict Even though each essay offers a unique perspective together they show the interconnectedness between cold war and national and transnational developments including long standing conflicts that preceded the cold war and persisted after its end or global transformations in areas such as human rights or economic and cultural globalization Because of its broad mandate the volume is structured not along conventional chronological lines but thematically offering essays on conceptual frameworks regional perspectives cold war instruments and cold war challenges The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history      *China, Russia, and the USA in the Middle East* Benjamin Houghton,Kasia A. Houghton,2023-12-01 The shift in international relations towards multipolarity has had profound implications across the world but particularly in highly

penetrated regions such as the Middle East This book explores the rivalry between the USA Russia and China in the region investigating its effects and assessing the influence of regional actors and issues Each chapter offers a comprehensive analysis of three core questions How does global power competition manifest itself How does it impact regional political economic and security dynamics How do regional actors and issues influence the trajectory and dynamics of global power competition Expert international contributors take a country case study approach to consider these questions and investigate the most pressing contemporary events issues and trends in Middle Eastern politics Tackling transregional and global issues and themes they analyse the convergence divergence and competition between global powers in managing threats and interests such as terrorism energy and cyber security nuclear non proliferation conflict resolution and warfare This volume will appeal to scholars and students of international relations great power competition China Russia the USA and the Middle East Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**The Great Power (mis)Management** Assoc Prof Alexander Astrov, 2013-03-28 Drawing on the empirical case of the Russian Georgian war of 2008 the book explores the theoretical underpinnings of the idea of great power management first articulated within the English School of International Relations The contributors to the volume approach this idea from a variety of theoretical perspectives ranging from policy analysis to critical theory but all of them are addressing the same question What does the Russian Georgian war of 2008 tell us about great power management as an institution of international society

**Territorial Expansion and Great Power Behavior During the Cold War** Dylan Motin, 2025-06-20 Motin examines great powers reactions to the rise of new powers in bipolar international systems by exploring an understudied problem the rarity of armed emergence after 1945 The book focuses on Egypt Iraq Syria and Vietnam the few minor powers that attempted to emerge as great powers through force during the Cold War Geography and existing powers reactions are analyzed as the two key factors determining a nation's attempts at territorial expansion to achieve power on the global political stage This systematic investigation of previously overlooked cases has profound implications for the scholarship on the rise and fall of great powers In a context where territorial conquest is returning worldwide scholars studying international relations international security and strategic studies should find valuable insights in this realist take

Institutional Balancing in the Asia Pacific Kai He, 2009 This book examines the strategic interactions among China the United States Japan and Southeast Asian States in the context of China's rise and globalization after the cold war Engaging the mainstream theoretical debates in international relations the author introduces a new theoretical framework institutional realism to explain the institutionalization of world politics in the Asia Pacific after the cold war Institutional realism suggests that deepening economic interdependence creates a condition under which states are more

likely to conduct a new balancing strategy institutional balancing i.e. countering pressures or threats through initiating utilizing and dominating multilateral institutions to pursue security under anarchy To test the validity of institutional realism Kai He examines the foreign policies of the U.S., Japan, the ASEAN states and China toward four major multilateral institutions Asia Pacific Economic Cooperation (APEC), the Association of Southeast Asian Nations (ASEAN), ASEAN Regional Forum (ARF), ASEAN Plus Three (APT) and East Asian Summit (EAS). Challenging the popular pessimistic view regarding China's rise, the book concludes that economic interdependence and structural constraints may well soften the dragon's teeth. China's rise does not mean a dark future for the region. Institutional Balancing in the Asia Pacific will be of great interest to policy makers and scholars of Asian security, international relations, Chinese foreign policy and U.S. foreign policy.

*Neoclassical Realism and Defence Reform in Post-Cold War Europe* T. Dyson, 2016-02-29 Dyson explains the convergence and divergence between British, French and German defence reforms in the post-Cold War era. He engages with cultural and realist theories and develops a neoclassical realist approach to change and stasis in defence policy, bringing new material to bear on the factors which have affected defence reforms.
