Adamczyk, 2021 This book is about how American religious parents approach the handing on of their religious practices and beliefs to their children We know a lot about the importance of parents in faith transmission and factors that influence its effectiveness But we know much less about the actual beliefs feelings and activities of the parents themselves when it comes to the intergenerational transmission of religious faith and practice *Raising the Race* Riché J. Daniel Barnes, 2015-12-01 Winner of the 2017 Race Gender and Class Section Book Award from the American Sociological Association Popular discussions of professional women often dwell on the conflicts faced by the woman who attempts to have it all raising

children while climbing up the corporate ladder Yet for all the articles and books written on this subject there has been little work that focuses on the experience of African American professional women or asks how their perspectives on work family balance might be unique Raising the Race is the first scholarly book to examine how black married career women juggle their relationships with their extended and nuclear families the expectations of the black community and their desires to raise healthy independent children Drawing from extensive interviews with twenty three Atlanta based professional women who left or modified careers as attorneys physicians executives and administrators anthropologist Rich J Daniel Barnes found that their decisions were deeply rooted in an awareness of black women s historical struggles Departing from the possessive individualistic discourse of having it all the women profiled here think beyond their own situation considering ways their decisions might help the entire black community Giving a voice to women whose perspectives have been underrepresented in debates about work family balance Barnes s profiles enable us to perceive these women as fully fledged individuals each with her own concerns and priorities Yet Barnes is also able to locate many common themes from these black women s experiences and uses them to propose policy initiatives that would improve the work and family lives of all Americans

Marriage, Domestic Life and Social Change David Clark, 2019-10-07 Marriage Domestic Life and Social Change brings together leading writers on marriage and the family in a tribute to the life and work of Jacqueline Burgoyne a major figure in family studies

The Swedish Experiment in Family Politics Allan C. Carlson, 2024-12-06 This devastating account of the work of Gunnar and Alva Myrdal is a monumental case study in the uses and abuses of social science It portrays how these two young scholars used the power of ideas to help engineer a new domestic order in Sweden The book focuses on the Myrdals unique fusion of socialism and feminism with nationalism and pro nationalism in their joint 1934 book Crisis in the Population Question turning the issue of Sweden s declining birthrate into the most effective argument for a radical socialist remodeling of society The author uses interviews with many of the figures involved and extensive archival research including restricted materials held by Sweden s Social Democratic Party to weave an uncommonly personal account of triumphant social engineering The

work of the Myrdals covered every major area of family policy and planning from a marriage loan program to maternity relief. Using theories and research of a then new science of demography the Myrdals did not so much demonstrate the interpretation of facts and values as blur the distinction between them in order to insinuate ideological claims and policy mandates. Carlson provides careful historical documentation of social welfare and policy in Sweden indicating the uneven path to the brave new middle way. There was renewed emphasis on domesticity and traditionalism in the 1950s and only in the 1980s was the Myrdal revolution truly completed. For Carlson that revolution was less a tribute to the Myrdals perspicacity than to a concurrence of circumstances, weak and inconsistent data, confusion over cause and effect and avoidance of controls in experimental settings. Swedish experiments in marriage and family yielded a variety of results: a triumph of feminism over socialism, of reason over tradition, central government over regionalism, urban multi-family dwellings over suburban single family models, the therapeutic over the moral, and finally the state over the family. Because the Swedish model is widely regarded and emulated, this critique is of immediate significance. It offers the general reader remarkable insight into the nature of Scandinavian social life and to the specialist in demography, economy and sociology a perspective on how social science can become itself the problem rather than provide solutions in contemporary post-industrial life. Allan Carlson is president of the Rockford Institute and a member of the National Commission on Children. He is the author of *Family Questions: Reflections on the American Social Crisis*. **Happiness and Well-Being in Islam** Sálua Omais, 2025-07-16. This book presents a theoretical model to understand happiness and well-being in Islam, combining a positive psychology approach and the teachings of the Quran and the Sunnah. With the evolution of positive psychology, the study of well-being gained broader and deeper dimensions that today encompass different peoples, cultures and worldviews. The fact that most of the knowledge disseminated around the world has been built from a Western perspective has created gaps in science about non-Western people's cultures and worldviews. This reality has given rise to new epistemological trends such as the revival of Islamic psychology, which seeks to recover classic knowledge and include new theoretical perspectives on the human psyche in line with Islamic beliefs and values. The topic of well-being in Islam has aroused interest among Western researchers in recent years, both in positive psychology due to its third wave and in the field of the psychology of religion. While Western science fragments knowledge into different areas of psychology, focusing on behaviors and actions that generate positive emotional states and relationships, the conception of well-being in Islamic psychology seems to coordinate all these behaviors with values, meanings and spiritual connections, integrating content from various approaches holistically. It is a system that connects beliefs, religious teachings, spiritual practices and prosocial behaviors based on a logic in which God, the individual and society are closely related to each other. Happiness and Well-Being in Islam will be of interest to both researchers and practitioners in fields such as clinical psychology, psychological assessment, positive psychology, psychology of religion and Islamic psychology, by providing theoretical insights to research as well as valuable information.

that can contribute to the construction of measurement instruments interventions and therapeutic practices in the clinical field and also in areas such as education health social and organizational environments

TV Family Values Alice Leppert, 2019-03-15 During the 1980s U S television experienced a reinvigoration of the family sitcom genre In TV Family Values Alice Leppert focuses on the impact the decade s television shows had on middle class family structure These sitcoms sought to appeal to upwardly mobile career women and were often structured around non nuclear families and the reorganization of housework Drawing on Foucauldian and feminist theories Leppert examines the nature of sitcoms such as Full House Family Ties Growing Pains The Cosby Show and Who s the Boss against the backdrop of a time period generally remembered as socially conservative and obsessed with traditional family values
