Theotokis, 2020-07-30 A complete history of paratroopers and their role in modern war including a glossary and photos Many books have been written about military parachuting particularly about famous operations like Crete and Arnhem in the Second World War and notable units like the British Parachute Regiment and the US 101st Airborne Division but no previous book has covered the entire history of the use of the parachute in warfare In this valuable study Nikolaos Theotokis traces in vivid detail the development of parachuting over the last hundred years and describes how it became a standard tactic in

twentieth century conflicts As well as depicting a series of historic parachute operations all over the world he recognizes the role of airmen in the story for they were the first to use the parachute in warfare when they jumped from crippled planes in combat conditions Adapting the parachute for military purposes occurred with extraordinary speed during the First World War and by the time of the Second World War it had become an established technique for special operations and offensive actions on a large scale The range of parachute drops and parachute led attacks was remarkable and all the most dramatic examples from the world wars and lesser conflicts are recounted in this graphic and detailed study The role played by parachute troops as elite infantry is also a vital part of the narrative as is the way in which techniques of air assault have evolved since the 1970s

The Battle of Manila Nicholas Evan Sarantakes, 2025 Douglas MacArthur had a special relationship with the city of Manila Many years before when he had decided to make a career in the U S Army like his father and had bounced around the globe he kept coming back to the city He received his first promotion in Manila and contracted malaria so severe the Army had to send him back to the United States The city was a constant in a life without many others

He was by any measure an exceptional soldier At the U S Military Academy he earned an athletic letter in baseball became the First Captain of the Corps of Cadets and finished first in a class of ninety three Commissioned in the Corps of Engineers he had first assignment in the Philippines The First Atomic Bomb Jim Mangi,2022-06-20 While German and Japanese scientists also labored unsuccessfully to create an atomic bomb by the summer of 1945 the American led team was ready to test its first weapon As the clock ticked down to the detonation time of 05 30 hours on 16 July 1945 the nervous team of technicians and scientists waited ten miles away from Ground Zero deep in the New Mexico desert No one knew how powerful the explosion would be or whether even at such a distance they would be safe from the blast Even so some chose to observe the detonation from a point four miles nearer at the control bunker but then no one was even sure that the bomb would work What if that is actually what happened Under schedule pressure from the White House the scientists assembled the device in part with tape and tissue paper knowing some components were flawed These are verifiable facts It means that as many of those who gathered in the New Mexico desert feared at the time the bomb might not have worked during that first test In The First Atomic Bomb Jim Mangi explores what might happened in the event that the world s first atomic bomb had not been ready for use when it was How would this have affected the end of the war in the Pacific and indeed the Second World War as a whole Would Emperor Hirohito s armed forces have battled on When might Colonel Paul W Tibbets at the controls of his Boeing B 29 Superfortress Enola Gay have then made his historic flight over Hiroshima and would that city even have remained the target How would Stalin and the Soviets have reacted to such developments and how would this have played out in the post war world **Fighting Elites** John C. Greene Jr.,2015-11-06 As America s collective memory of the Second World War fades popular history books and the entertainment industry have filled the knowledge gap with accounts from the European Theater A resurgence in works focusing on the war in the Pacific has surfaced in recent years but the topic still

requires a fresh perspective In particular the American airborne experience in the Pacific presents a field ripe for exploration This historical monograph argues that a careful review of the operations involving the 11th Airborne Division the 503rd Parachute Infantry Regiment and the 1st Marine Parachute Battalion reveals a measure of foresight on the part of those who designed campaign plans in the Pacific General Joseph Swing s implementation of the Paraglider concept in the 11th Airborne enabled his unit to perform a variety of tasks including amphibious operations parachute drops and POW camp raids The Allies only independent parachute regiment in the Pacific the 503rd successfully employed the combined arms concept in its capture of Nadzab and set the conditions for the Allied reduction of Japanese defenses around Rabaul The United States Marine Corps short lived experiment with airborne forces revealed the usefulness of units in multi role functions but ultimately betrayed an inability to execute actual parachute drops because of logistical limitations in the ocean environment Air University Library Index to Military Periodicals ,1997 **Colt Terry, Green Beret** Charles D. Patton,2005 Through one man s career Colt Terry Green Beret portrays the birth and development of America s most elite fighting unit The 10th Special Forces Group was the first of the Green Beret units **America's Heroes** James H.
