Personal Capitalism and Corporate Governance Myrddin John Lewis,Roger Lloyd-Jones,Mark David Matthews,2016-05-13 This book is specifically aimed at addressing a gap in the study of the evolution of corporate governance in Britain In particular its key theme the relationship between corporate governance

and personal capitalism in British manufacturing in the first half of the twentieth century provides the means for a systematic and critical examination of the dominant Chandlerian paradigm that the long running persistence of personal capitalism shaped the governance of British manufacturing firms well into the twentieth century and acted to erode their competitive performance The book helps to identify those aspects of corporate governance that have undergone change with some critical observations on the magnitude of change and those aspects which have displayed characteristics of continuity The empirical spine of this book is set out in a series of case studies which provide the basis for the examination of corporate governance in Britain during the period c 1900 to 1950 By focusing particularly on the responses of a range of businesses to the turbulent environment of the inter war years this volume offers an insight into a much neglected yet vital area of business and economic history

Exchange Rates and Economic Policy in the 20th Century Derek H. Aldcroft, 2017-07-05 The themes of this study are the exchange rate regimes chosen by policy makers in the twentieth century the means used to maintain these regimes and the impact of these decisions on individual national economies and the world economy in general The book draws heavily on new research showing the lessons and the legacy left for policy makers by the gold standard and the attempt at its resurrection in the 1920s In examining issues such as the gold exchange standard the gold bullion standard the experience of floating exchange rates the Bretton Woods arrangements the EMS and the ERM and the Currency Board approach there is a conscious attempt to draw out the relevance of history for policy makers now

The Seaside, Health and the Environment in England and Wales since 1800 John Hassan, 2016-12-05 The seaside has always held a special position in British history as a place of rest relaxation and recuperation Over the last 200 years many have made their way to the coast attracted by the long sunshine hours the clean ozone charged air and the opportunities for bathing in and even drinking sea water Although the early health resort ideal began to give way to more pleasure orientated themes in the nineteenth century the seaside holiday was still regarded by many as a wholesome and invigorating break from inland urban life well into the twentieth century Yet with ever increasing numbers of visitors and rising levels of coastal pollution this was by no means a forgone conclusion The Seaside Health and the Environment in England and Wales since 1800 explores the ways in which English seaside resorts continually reinvented themselves to take account of contemporary trends in popular leisure and maintain their hold on the public's imagination Particular account is paid to the interwar years when new obsessions with outdoor activities such as sunbathing and tanning were purposefully adopted by the industry to define the modern image of the resort holiday For these and other reasons the seaside holiday reached new peaks of popularity in the 1930s and 1950s yet this very success placed enormous pressures on the environmental amenities that people came to enjoy As this work shows environmental stresses were manifold particularly pollution of the resorts prime assets their beaches As such serious questions are raised concerning why it took such a long time for a determined effort to be made to reverse beach pollution and the lessons to be learned regarding the impact of negative images of the coast as a zone of danger and

infection *Industrial Clusters and Regional Business Networks in England, 1750-1970* John Wilson, Andrew Popp, 2017-07-05 Although economists have long recognised industrial districts as one of the key features of many economies it is only recently that attention has been focused on the region as an effective means of generating accurate insights into the larger picture of economic performance This renewed interest in regional issues has also placed at centre stage the role played by networks as a principal organisational feature of the local business community providing scholars with a rich topic for investigation and debate Recent work has shown that universal generalisations concerning the impact of networking on the performance of industrial clusters lack credibility highlighting the consequent need to compare the role played by business networks in a variety of regions Using a copious range of research material examining several British regions this volume poses a series of fundamental questions about the nature of industrial clusters and networks Particular attention is paid to identifying the basic characteristics of a network outlining how they evolved in key industrial clusters and assessing their impact on industrial performance both regionally and nationally The durability of such networks is another key thread that runs through the essays prompting comparison with industrial clusters in Britain and abroad These are issues which stimulate discussion on a wide range of factors within the disciplines of business economic and social history

Technology, Industrial Conflict and the Development of Technical Education in 19th-Century England Bernard P. Cronin, 2024-11-01 This title was first published in 2001 Nineteenth century employers played a crucial role in the training and education of young workers in England This multi disciplinary study traces the connection between problems of technical education development and the increasingly antagonistic relations with skilled workers culminating in the Great Strike and Lockout of 1897 Cronin demonstrates that employers dominated by economic short termism extended their hegemony beyond the boundaries of the factory gates Their reluctance to endorse and sponsor technical education radically influenced the perception of technical education held by government and local authorities **Studies in the Interwar European**

Economy Derek H. Aldcroft, 2019-05-23 First published in 1997 this book analyses some of the key economic issues facing Europe in the interwar period against the uncertain international political and economic background of the time Among the subjects discussed are the legacy of the peace settlements inflation trade and reconstruction international lending depression and recovery the position of Eastern and Central Europe and the progress of the peripheral nations The book contends that the peace treaties raised more problems than they solved while the policy mistakes of the Allied powers after the First World War and their failure to devise an adequate programme of economic and financial reconstruction weakened the already divided continent contributing to its disintegration **Trade Unions and the Economy: 1870-2000** Derek H.

Aldcroft, Michael J. R. Guerriero Wilson, 2018-12-17 First published in 1998 this book explores the physical and technological changes which occurred in the growing bureaucracies of big business and of government as well as in the small and mid size business of the city The study of these changes provides a context within which to set the complementary experiences of the men and women who chose to seek a living in the wide array of constantly changing office jobs

Manufacturing World, 1851-1951 Philip Hamlyn Williams, 2022-07-28 The peoples of the British Isles gave to the world the foundations on which modern manufacturing economies are built This is quite an assertion but history shows that in the late eighteenth century a remarkable combination of factors and circumstances combined to give birth to Britain as the first manufacturing nation Further factors allowed it to remain top manufacturing dog well into the twentieth century while other countries were busy playing catch up Through two world wars and the surrounding years British manufacturing remained strong albeit while ceding the lead to the United States This book seeks to tell the remarkable story of British manufacturing using the Great Exhibition of 1851 as a prism Prince Albert and Sir Henry Cole had conceived an idea of bringing together exhibits from manufacturers across the world to show to its many millions of visitors the pre eminence of the British 1851 was not the start but rather a pause for a bask in glory This book traces back from the exhibits in Hyde Park s Crystal Palace to identify the factors that gave rise to this pre eminence then follows developments up until the Festival of Britain exactly one century later Steam power and communication by electric telegraph both British inventions predated the Exhibition After it came the sewing machine and bicycle motor car and aeroplane but also electrical power radio and the chemical and pharmaceutical industries where Britain played a leading part
