Dive Into Algorithms Bradford Tuckfield, 2021-01-05 Dive Into Algorithms is a broad introduction to algorithms using the Python Programming Language Dive Into Algorithms is a wide ranging Pythonic tour of many of the world's most interesting algorithms With little more than a bit of computer programming experience and basic high school math you'll explore standard computer science algorithms for searching sorting and optimization human based algorithms that help us determine how to catch a baseball or eat the right amount at a buffet and advanced algorithms like ones used in machine learning and artificial intelligence You'll even explore how ancient Egyptians and Russian peasants used algorithms to multiply numbers how the ancient Greeks used them to find greatest common divisors and how Japanese scholars in the age of samurai designed algorithms capable of generating magic squares You'll explore algorithms that are useful in pure mathematics and learn how mathematical ideas can improve algorithms You'll learn about an algorithm for generating continued fractions one for quick calculations of square roots and another for generating seemingly random sets of numbers You'll also learn how to Use algorithms to debug code maximize revenue schedule tasks and create decision trees Measure the efficiency and speed of algorithms Generate Voronoi diagrams for use in various geometric applications Use algorithms to build a simple chatbot win at board games or solve sudoku puzzles Write code for gradient ascent and descent algorithms that can find the maxima and minima of functions Use simulated annealing to perform global optimization Build a decision tree to predict happiness based on a person's characteristics Once you've finished this book you'll understand how to code and implement important algorithms as well as how to measure and optimize their performance all while learning the nitty gritty details of today's most powerful algorithms

Parallel and Distributed Processing and Applications Jiannong Cao, Laurence T. Yang, Minkyu Guo, Francis Lau, 2005-01-17

Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong China 13-15 December 2004 With the advance of computer networks and hardware technology parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches It provides a means to solve computationally intensive problems by improving processing speed It is also the only able approach to building highly reliable and inherently distributed applications ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences new ideas research results and applications about all aspects of parallel and distributed computing There was a very large number of paper submissions 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America All submissions were reviewed by at least three program or technical committee members or external reviewers It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions In order to allocate

as many papers as possible and keep the high quality of the conference we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations We believe that all of these papers and topics not only provide novel ideas new results work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications
