Rapid Population Growth Vol 2:

Rapid population growth .. ,1972 **The Cambridge Economic History of Modern Europe: Volume 2, 1870 to the Present** Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach The Cambridge Economic History of Modern Europe rethinks Europe's economic history since 1700 as unified and pan European with the material organized by topic rather than by country This second volume tracks Europe's economic history through three major phases since 1870 The first phase was an age of globalization and of European economic and political dominance that lasted until the First World War The second from 1914 to 1945 was one of war deglobalization and depression and the third was one of growing integration not only within Europe but also between Europe and the global economy Leading authors offer comprehensive and accessible introductions to these patterns of globalization and deglobalization as well as to key themes in modern economic history such as economic growth business cycles sectoral developments and population and living standards *China's New Sources of Economic Growth: Vol. 2* Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2017-07-20 China's efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year's book elucidates key present macroeconomic challenges facing China's economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China's economy The book explores the development of human capital as the foundations of China's push into more advanced growth frontiers It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China's human capital investments to success on this front The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions sectors and invention motivations Included are chapters providing an update on reform and macroeconomic development educational inequality the role of intangibles in determining China's economic growth and China's progress in transitioning towards being an innovative country The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity renewable energy and financial markets Chapters on trade investment regional cooperation and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally Jewish Economies (Volume 2) Simon Kuznets, 2017-07-05 Nobel Laureate Simon Kuznets famous as the founder of modern empirical economics pioneered the quantitative study of the economic history of the Jews Yet until now his most important work on the subject was unpublished This second collection of previously unavailable material issued by Transaction brings to the public for the first time the most important economic work written on Jewish migration since that of Werner Sombart a century ago This volume of Kuznets work includes three main essays The first titled Immigration and the Foreign Born was Kuznets first work on

immigration and discusses the impact of the general foreign born on the U S Kuznets and his co author Ernest Rubin offer the essay as a quantitative antidote to the misinformation that led many Jews to support the restrictions ending Jewish migration in the 1920s The second Israel s Economic Development discusses the impact of mass immigration and other factors on Israeli productivity providing in English for the first time one of the first detailed studies of the economic development of the state of Israel The final essay on Immigration of Russian Jews to the United States is the most famous of Kuznets writings and provides a clear view backed by a seminal paper that launched the contemporary social scientific study of Jewry It discusses the details of the labor force skills and general structure of Eastern European Jewish immigrants to the U S

Property, Social Structure, and Law in the Modern Middle East Ann Elizabeth Mayer, 1985-01-01 For too long the study of law and society in the modern Middle East has been left to specialists in narrow subcategories of law or the social sciences Property Social Structure and Law in the Modern Middle East lays the groundwork for a new field of scholarship in which analysis of the social dimensions of law and the legal dimensions of social structure are integrated It

offers the stimulus of a variety of new models of scholarship by a distinguished international group of contributors whose work shares a common focus on regimes of property in the societies of the modern Middle East The case studies examine the regulations of many kinds of property in relation to the social structures of selected Middle Eastern communities from the eighteenth century to the present Most of the societies studied are subjected to pressures for rapid modernization and adjustment to major economic transformations The book features comparisons of property rights and relations under regimes of Islamic and customary law as well as modern statutory law Highlighted are new patterns of intervention by modern Middle Eastern states to alter traditional regimes of property and to transform the accompanying social structures Their implications for development are also considered The book's notes and bibliographies constitute a valuable resource for anyone interested in further research
