Final CRADA Report** ,1998 US industry is fighting to maintain its competitive edge in the global market place Markets fluctuate rapidly Companies have to be able to respond quickly with improved high quality cost efficient products Because companies and their suppliers are geographically distributed rapid product realization is dependent on the development of a secure integrated concurrent engineering environment operating across multiple business entities The way products are developed and brought to market can be improved and made more efficient through the proper incorporation of emerging technologies implemented in a secure environment This documents the work done under this CRADA to develop capabilities which permit the effective application incorporation and use of advanced technologies in a secure environment to facilitate the product realization process Lockheed Martin Energy Systems LMES through a CRADA with the National Center for Manufacturing Sciences NCMS worked within a consortium of major industrial firms Ford General Motors Texas Instruments United Technologies and Eastman Kodak and several small suppliers of advanced manufacturing technology MacNeal Schwendler Corp Teknowledge Corp Cimplex Corp Concentra Spatial Technology and Structural Dynamics Research Corp SDRC to create infrastructure to support the development and implementation of secure engineering environments for Rapid Response Manufacturing The major accomplishment achieved under this CRADA was the demonstration of a prototypical implementation of a broad based generic framework for automating and integrating the design to manufacturing activities associated with machined parts in a secure NWC compliant environment Specifically methods needed to permit the effective application incorporation and use of advanced

Direct Engineering: Toward Intelligent Manufacturing Ali K. Kamrani, Peter R. Sferro, 2012-12-06 Direct Engineering DE is the creation of a product development cycle into a single unified process The design process in most industries is an evolutionary one i.e. incremental changes to some existing design DE is a manufacturing process that seeks to improve the design processes by providing complete archival documentation of existing designs It uses three dimensional geometric models with integrated manufacturing information throughout the design process DE reduces the design cycle and the variety and number of engineering changes This process decreases the design cycle time increases productivity and provides a higher quality product The required technologies and methodologies that will support the development of the DE environment are 1 product representation using feature based modeling 2 knowledge based applications that will support the entire product development cycle 3 an engineering environment implemented around distributed computing and object oriented systems 4 direct manufacturing techniques using rapid prototyping

Direct Engineering Toward Intelligent Manufacturing addresses the following recent topics related to the development implementation and integration of the DE environment 1 the current scope of the research in intelligent manufacturing 2 the results of the technologies and tools developed for integrated product and process designs and 3 examination of the methodologies and algorithms used for the implementation of direct engineering

Proceedings of 20th International Conference on Industrial Engineering and Engineering Management Ershi Qi, Jiang Shen, Runliang Dou, 2013-12-16 The International Conference on Industrial Engineering and Engineering Management is sponsored by the Chinese Industrial Engineering Institution CMES which is the only national level academic society for Industrial Engineering. The conference is held annually as the major event in this arena. Being the largest and the most authoritative international academic conference held in China, it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings. Many experts in various fields from China and around the world gather together at the conference to review, exchange, summarize and promote their achievements in the fields of industrial engineering and engineering management. For example, some experts pay special attention to the current state of the application of related techniques in China as well as their future prospects such as green product design, quality control and management, supply chain and logistics management to address the need for, amongst other things, low carbon energy saving and emission reduction. They also offer opinions on the outlook for the development of related techniques. The proceedings offers impressive methods and concrete applications for experts from colleges and universities, research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications. As all the papers are of great value from both an academic and a practical point of view, they also provide research data for international scholars who are investigating Chinese style enterprises and engineering management.

Strategic Marketing Frank Bradley, 2003-06-02 Das Marketing ist eine der wichtigsten, wenn nicht gar die wichtigste Aufgabe jedes erfolgreichen Unternehmens. Das Analysieren der Kundenbasis und das stete Bemühen, die Kundenerwartungen effektiver zu erfüllen und zu übertreffen als die Konkurrenz, sind der Schlüssel zu langfristigem strategischem Erfolg. Nur wenige Lehrbücher konzentrieren sich direkt auf den Kunden. Die meisten folgen entweder dem traditionellen Marketing Mix Ansatz, der auf den 4 Ps beruht, und gehen kaum auf das Marketing in einem weiter gefassten Kontext ein. Fazit: Diese Lehrbücher sind in der Regel viel zu umfangreich und nicht ganz zeitgemäß. Strategic Marketing ist anders. Das Buch ist kundenorientiert und konzentriert sich im wesentlichen auf die drei Gründe, warum ein Unternehmen existiert: um den Kunden Wert bereitzustellen, zu kommunizieren und zu vermitteln. Prägnant, anschaulich und praxisnah.
