

Wilfred Owen (1893-1918)

**Dulce et Decorum Est**

Bent double, like old beggars under sacks,  
Knock-kneed, coughing like hags, we cursed  
through sludge,

Till on the haunting flares we turned our  
backs

And towards our distant rest began to  
trudge.

Men marched asleep. Many had lost their  
boots,

But limped on, blood-shod. All went lame;  
all blind;

Drunk with fatigue; deaf even to the hoots  
Of tired, outstripped Five-Nines that  
dropped behind.

Gas! GAS! Quick, boys! – An ecstasy of  
fumbling,

Fitting the clumsy helmets just in time;  
But someone still was yelling out and  
stumbling

And flound'ring like a man in fire or lime . . .  
Dim through the misty panes and thick  
green light,

As under a green sea, I saw him drowning.  
In all my dreams before my helpless sight,  
He plunges at me, guttering, choking,  
drowning.

If in some smothering dreams, you too  
could pace

Behind the wagon that we flung him in,  
And watch the white eyes writhing in his  
face,

His hanging face, like a devil's sick of sin;  
If you could hear, at every jolt, the blood  
Come gargling from the froth-corrupted  
lungs,

Obscene as cancer, bitter as the cud  
Of vile, incurable sores on innocent  
tongues, –

My friend, you would not tell with such high  
zest

To children ardent for some desperate glory,  
The old Lie: Dulce et decorum est  
Pro patria mori.

*The Lever of Riches* Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics  
technological creativity is ever more the key to economic success But why are some nations more creative than others and  
why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation  
Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing  
the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this  
survey is often surprising the classical world for instance was largely barren of new technology the relatively backward  
society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution  
was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages  
of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the  
relationship of inventors and their physical environment which determined their willingness to challenge nature and the  
social environment which determined the openness to new ideas He discusses a long list of such factors showing how they  
interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies  
examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain  
and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up  
a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the  
impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors

as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
