

RARE and
ENDANGERED
PLANTS of New Zealand

DAVID R. GIVEN

Rare And Endangered Plants Of New Zealand

Charles Robert Long

Rare And Endangered Plants Of New Zealand:

Threatened plants of New Zealand, 1989 **Threatened Plants of New Zealand** Catherine M. Wilson, David R. Given, 1989 Statement for DSIR information series from cataloguing data on p iv *Rare and Endangered Plants of New Zealand* David R. Given, 1981 **1997 IUCN Red List of Threatened Plants** World Conservation Monitoring Centre, 1998

This book represents the most comprehensive compilation of data on threatened vascular plants ever published It includes the names of some 33 000 plant species determined to be rare or threatened on a global scale Conservation assessments were provided by the IUCN Species Survival Commission the National Botanical Institute South Africa Environment Australia and CSIRO The Nature Conservancy the Smithsonian Institution and the Royal Botanic Gardens Kew together with hundreds of botanic gardens and botanists throughout the world The Royal Botanic Gardens Edinburgh and the New York Botanical Garden have made major in kind contributions The result of 20 years work by botanists and conservationists around the world it is intended as a conservation tool a provider of baseline information to measure conservation progress and as a primary source of data on plant species Most importantly however it provides the building blocks on which to base a worldwide effort to conserve plant species

New Lepidium (Brassicaceae) from New Zealand Peter James De Lange, Peter Brian Heenan, G. J. Houlston, Jeremy R. Rolfe, A. D. Mitchell, 2013 The vascular flora of New Zealand contains an estimated 2400 species of indigenous plant of which a staggering 83% are endemic Nevertheless despite the 244 years of botanical exploration there are still many flowering plants left to formally describe from New Zealand In this issue of *PhytoKeys* the diversity of the endemic Cook s Scurvy grass *Lepidium oleraceum* is subjected to a modern taxonomic treatment recognising in the process ten new endemic species and accepting six others described by past workers This issue includes detailed descriptions for all 16 *Lepidium* species and discusses their ecology ethnobotany and conservation status A dichotomous key to the naturalised and indigenous *Lepidium* of the New Zealand archipelago is also provided

Endangered Plant Species of the World and Their Endangered Habitats, 1985 Rarity K.J. Gaston, 2012-12-06

To say you are writing about rarity is to invite two kinds of response Either one provokes a discussion of what rarity is or some comment on the complex ity of the subject The objective of this book is to explore the nature of rarity its complexity if you like from one particular perspective on what rarity is Primarily it is an opportunity to review to synthesize and to question The book is an attempt to draw together a vast body of literature to extract from it some general principles and to raise question marks over areas the founda tions of which appear to be either absent or crumbling A perusal of prefaces suggests that they often dwell as long upon what a book is not about as upon what it does concern True to such a tradition I should state that this is specifically not a book about conservation although in some quarters anything about rarity is viewed as something about conser vation Nor does it contain more than a passing reference to the undoubtedly important issues of the role of genetics in rarity Examples have been drawn from a wide variety of taxa They are nonethe less somewhat

depauperate in cases from marine systems In part this bias results from the unevenness of my familiarity with the literature in part it perhaps also reflects differences in the questions asked and approaches to the study of communities and assemblages in terrestrial and marine systems **Technologies to Maintain Biological Diversity** ,1986 **Endangered Plant Species of the World and Their Endangered Habitats** Charles Robert Long,1978 **Journal of the Royal Society of New Zealand** ,1989-12 **Journal of the Royal Society of New Zealand** ,1986-09 Management of Endangered Plants S. C. Cropper,1993 Guide for rangers planners scientific officers botanists and naturalists wanting to aid the survival of Australia s endangered flora Provides information on the monitoring and management of rare and endangered species Discusses reasons why plants become threatened and conservation strategies Includes many case studies a list of useful contacts a bibliography and an index The author is a botanical consultant who has published widely on the management of threatened taxa Conservation and Evolution Otto Frankel,Michael E. Soulé,1981-03-12 Journal of the Royal Society of New Zealand ,1988-12 **The Road to Extinction** Richard Fitter,Maisie Fitter,1987 **Encyclopedia of Biodiversity** ,2013-02-05 The 7 volume Encyclopedia of Biodiversity Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity The science of biodiversity has become the science of our future It is an interdisciplinary field spanning areas of both physical and life sciences Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

Kew - Rare Plants Ed Ikin,Royal Botanic Gardens Kew,2023-10-12 Some plants are inherently rare while others become rare through our actions Rare Plants explores what makes the world s most uncommon plants so exceptional and by what means they have become so scarce From highlands to jungles many of our most extraordinary plants are vanishing at shocking rates and this exquisitely illustrated book explores 40 of these mysterious species Featuring stunning archive images and expert insight from the Royal Botanical Gardens Kew Rare Plants explores both the beauty and necessity of our endangered plant life *Plants in Danger* Stephen D. Davis,1986 **New Zealand Journal of Botany** ,2011 **Monthly Catalogue, United States Public Documents** ,1981
