Retratos de La Belle Époque Tomás Llorens Serra, 2011 El retrato con una notable demanda comercial es el género pictórico más representativo de finales del siglo XIX y principios del XX. Ilustra el nuevo individualismo del hombre moderno y su interés por la imagen que proyecta en su entorno social. Desde el punto de vista de la historia del arte es un género que permite explicar los cambios que se producen tanto en las convenciones estilísticas como en las relaciones entre el artista y su público o mercado. A través de tres generaciones de pintores la exposición aborda distintos aspectos del retrato para reflejar el tránsito desde un estado de ánimo inicial triunfal y confiado propio de los primeros años hasta la aguda inquietud crítica de los retratos expresionistas de los años finales que cierran el recorrido de la muestra.
