intellectual social and political conditions influenced the discipline by conditioning both anthropological inquiry and the avenues of research supported by universities and governments Finally it is a study of the politics of anthropology itself examining the survival of theses or schools of thought and the influence of certain individuals and departments **The Cumulative Book Index** ,1979 A world list of books in the English language **Howard University Studies in the Social Sciences** Howard University. of the four fields of anthropology in China Looking at both the political and social contexts Greg Guldin demonstrates how political turmoil has shaped China's twentieth century anthropological landscape
