*Extracting Accountability from Non-State Actors in International Law* Lee James McConnell, 2016-11-10 The human rights of communities in many resource rich weak governance States are adversely affected not only by the acts of States and their agents but also by powerful non State actors Contemporary phenomena such as globalisation privatisation and the proliferation of internal armed conflict have all contributed to the increasing public influence of these entities and the correlative decline in State power This book responds to the persistent

challenges stemming from non State actors linked to extractive industries In light of the intersecting roles of multinational enterprises and non State armed groups in this context these actors are adopted as the primary analytical vehicles The operations of these entities highlight the practical flaws of existing accountability regimes and permit an exploration of the theoretical challenges that preclude their direct legal regulation at the international level Drawing insights from discursive democracy compliance theories and the Pure Theory of Law the book establishes a conceptual foundation for the creation of binding international obligations addressing non State actors Responding to the recent calls for a binding business and human rights treaty at the UN Human Rights Council and the growing influence of armed non State actors the book makes a timely contribution to debates surrounding the direction of future developments in the field of international human rights law

*Historical Dictionary of the Dirty Wars* David Kohut, Olga Vilella, 2016-11-16 The Historical Dictionary of the Dirty Wars covers the period 1954-1990 in South America when authoritarian regimes waged war on subversion both real and imagined The term dirty war guerra sucia though originally associated with the military dictatorship in Argentina from 1976 to 1983 has since been applied to neighboring dictatorships in Paraguay 1954-1989 Brazil 1964-1985 Bolivia 1971-1981 Uruguay 1973-1985 and Chile 1973-1990 Although the concept is by no means peculiar to Latin America the term has become a byword for state sponsored repression anywhere in the world these regimes were among its most notorious practitioners In the mid 1970s they joined forces along with Ecuador and Peru to create Operation Condor a top secret network of military dictatorships that kidnapped tortured and disappeared one another's political opponents Their death squads operated both nationally and internationally sometimes beyond the region This third edition of Historical Dictionary of the Dirty Wars contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 400 cross referenced entries on the countries themselves guerrilla and political movements that provoked though by no means exonerated governmental reaction leading guerrilla human rights military and political figures local regional and international human rights organizations expressions of cultural resistance art film literature music and theater and artistic figures filmmakers novelists and playwrights whose works attempted to represent or resist the period of repression This book is an excellent access point for students researchers and anyone wanting to know more about the dirty wars of South America

*Creating the New Right Ethnic in 1970s America* Richard Moss, 2017-03-15 This work analyzes the New Ethnicity of the 1970s as a way of understanding America's political turn to the right in that decade An upsurge of vocal ethnic consciousness among second third and fourth generation Southern and Eastern Europeans the New Ethnicity simultaneously challenged and emulated earlier identity movements such as Black Power The movement was more complex than the historical memory of racist reactionary white ethnic leaders suggests The movement began with a significant grassroots effort to gain more social welfare assistance for near poor white ethnic neighborhoods and ease tensions between the working class African Americans and whites who lived in close proximity to one another in urban neighborhoods At the

same time a more militant strain of white ethnicity was created by urban leaders who sought conflict with minorities and liberals. The reassertion of ethnicity necessarily involved the invention of myths, symbols and traditions and this process actually served to retard the progressive strain of New Ethnicity and strengthen the position of reactionary leaders and New Right politicians who hoped to encourage racial discord and dismantle social welfare programs. Public intellectuals created a mythical white ethnic who shunned welfare, valued the family and provided an antidote to liberal elitism and neighborhood breakdown. Corporations and publishers embraced this invented ethnic identity and codified it through consumption. Finally, politicians appropriated the rhetoric of the New Ethnicity while ignoring its demands. The image of hard working self sufficient ethnics who took care of their own neighborhood problems became powerful currency in their effort to create racial division and dismantle New Deal and Great Society protections.

U.S. Foreign Policy and the Other Michael Patrick Cullinane, David Ryan, 2014-11-01 John Quincy Adams warned Americans not to search abroad for monsters to destroy yet such figures have frequently habituated the discourses of U.S. foreign policy. This collection of essays focuses on counter identities in American consciousness to explain how foreign policies and the discourse surrounding them develop. Whether it is the seemingly ubiquitous evil of Hitler during World War II or the more complicated perceptions of communism throughout the Cold War, these essays illuminate the cultural contexts that constructed rival identities. The authors challenge our understanding of others looking at early applications of the concept in the eighteenth century to recent twenty first century conflicts, establishing how this phenomenon is central to decision making through centuries of conflict.

*North American Odyssey* Craig E. Colten, Geoffrey L. Buckley, 2014-03-27 This groundbreaking volume offers a fresh approach to conceptualizing the historical geography of North America by taking a thematic rather than a traditional regional perspective. Leading geographers building on current scholarship in the field explore five central themes. Part I explores the settling and resettling of the continent through the experiences of Native Americans, early European arrivals and Africans. Part II examines nineteenth century European immigrants, the reconfiguration of Native society and the internal migration of African Americans. Part III considers human transformations of the natural landscape in carving out a transportation network, replumbing waterways, extracting timber and minerals, preserving wilderness and protecting wildlife. Part IV focuses on human landscapes, blending discussions of the visible imprint of society and distinctive approaches to interpreting these features. The authors discuss survey systems, regional landscapes and tourist and mythic landscapes as well as the role of race, gender and photographic representation in shaping our understanding of past landscapes. Part V follows the urban impulse in an analysis of the development of the mercantile city, nineteenth and twentieth century planning and environmental justice. With its focus on human environment interactions, the mobility of people and growing urbanization, this thoughtful text will give students a uniquely geographical way to understand North American history.
