Uneasy Subjects Silke Stroh, 2011-01-01 Scottish and Celtic fringe postcolonialism has caused much controversy and unease in literary studies Can the non English territories and peoples of the British Isles faced with centuries of English hegemony be meaningfully compared to former overseas colonies This book is the first comprehensive study of this topic which offers an in depth study of Gaelic literature It investigates the complex interplay between Celticity Gaeldom Scottish and British national identity and international colonial and postcolonial discourse It situates post colonial elements in Gaelic poetry within a wider context showing how they intersect with socio historical and political issues anglophone literature and the media Highlighting the centrality of Celticity as an archetypal construct in colonial discourses ancient and modern this volume traces post colonial themes and strategies in Gaelic poetry from the Middle Ages to the present Central themes include the uneasy position of Gaels as subjects of the Scottish or British state and as both intra British colonised and overseas colonisers Aiming to promote interdisciplinary dialogue it is of interest for scholars and students of Scottish Studies Gaelic and English literature and international Postcolonial Studies

Making Laws for a Christian Society Roy Flechner, 2021-03-31 This is the first comprehensive study of the contribution that texts from Britain and Ireland made to the development of canon law in early medieval Europe The book concentrates on a group of insular texts of church law chief among them the Irish Hibernensis tracing their evolution through mutual influence their debt to late antique traditions from around the Mediterranean their reception and occasional rejection by clerics in continental Europe their fusion with continental texts and their eventual impact on the formation of a European canonical tradition Canonical collections penitentials and miscellanies of church law and royal legislation are all shown to have been living texts which were continually reshaped through a process of trial and error that eventually gave rise to a more stable and more coherent body of church laws Through a meticulous text critical study Roy Flechner argues that the growth of church law in Europe owes as much to a serendipitous conversation between texts as it does to any deliberate plan overseen by bishops and popes

Rural Society in the Age of Reason Chris J. Dalglish, 2006-04-11 My interest in the archaeology of the Scottish Highlands began long before I had any formal training in the subject Growing up on the eastern fringes of the southern Highlands close to Loch Lomond it was not hard to stumble across ruined buildings old field boundaries and other traces of everyday life in the past This is especially true if you spend much time as I have done climbing the nearby mountains and walking and driving through the various glens that give access into the Highlands At the time I had no real understanding of these remains simply accepting them as being built and old After studying archaeology for a few years at the University of Glasgow itself only a short commute from the area where I grew up I became acutely aware that I still had no real understanding of these familiar

yet enigmatic buildings and fields This and a growing interest in Scotland's historical archaeology drove me to take several courses on the subject of rural settlement studies These courses allowed me to place what I now knew to be houses barns mills shieling transhumance settlements rig and furrow cultivation and other related remains in history Overwhelmingly they seemed to date from the period of the last 300 years I also began to understand how they all worked together as component parts of daily rural life in the past

The Iron Age in Northern Britain Dennis W. Harding, 2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged to an Atlantic European mainstream different from southern England and its immediate continental neighbours

Books Ireland, 2003 **International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences**, 2006 *Ireland and migration in the twenty-first century* Mary Gilmartin, 2015-07-29 Considers migration to from and within Ireland in the twenty first century covering the Celtic Tiger era of mass immigration to Ireland as well as the dramatic growth in levels of emigration that has occurred since the Irish economic collapse

The Atlantic Iron Age Jon Henderson, 2007-12 First Published in 2008 Routledge is an imprint of Taylor Francis an informa company

Migration Theory Caroline B. Brettell, James F. Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world To remedy the tendency of scholars to speak only to and from their own disciplinary perspective this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences Editors Caroline B Brettell and James F Hollifield have guided a thorough revision of this seminal text with valuable insights from such fields as anthropology demography economics geography history law political science and sociology Each essay focuses on key concepts questions and theoretical frameworks on the topic of international migration in a particular discipline but the volume as a whole teaches readers about similarities and differences across the boundaries

between one academic field and the next How for example do political scientists wrestle with the question of citizenship as compared with sociologists and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity Are economic theories about ethnic enclaves similar to those of sociologists What theories do historians the essentializers and demographers the modelers draw upon in their attempts to explain empirical phenomena in the study of immigration What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates All of the social science disciplines will find that this book offers a one stop synthesis of contemporary thought on migration
