Return To Resistance Breeding Crops To Reduce Pesticide Dependence:

Return to Resistance Raoul A. Robinson, 1996 In the tradition of Silent Spring Raoul Robinson's *Return to Resistance* calls for a revolution Traditional plant breeding techniques have led us to depend more and more on chemical pesticides to protect our crops *Return to Resistance* shows gardeners farmers and plant breeders how to use a long neglected technique to create hardy new plant varieties that are naturally resistant to pests and disease Horizontal resistance breeding has been largely ignored in this century due to the popularity and apparent successes of the Mendelian geneticists However the colossal unrecognized failure of m *Return to Resistance* Raoul A. Resistance Roberto Fritsche-Neto, Aluizio Borém, 2012-10-01 Experience shows that biotic stresses occur with different levels of intensity in nearly all agricultural areas around the world The occurrence of insects weeds and diseases caused by fungi bacteria or viruses may not be relevant in a specific year but they usually harm yield in most years Global warming has shifted the paradigm of biotic stresses in most growing areas especially in the tropical countries sparking intense discussions in scientific forums This book was written with the idea of collecting in a single publication the most recent advances and discoveries concerning breeding for biotic stresses covering all major classes of biotic challenges to agriculture and food production Accordingly it presents the state of the art in plant stresses caused by all microorganisms weeds and insects and how to breed for them *Complementing Plant Breeding for Abiotic Stress Tolerance* this book was written for scientists and students interested in learning how to breed for biotic stress scenarios allowing them to develop a greater understanding of the basic mechanisms of resistance to biotic stresses and develop resistant cultivars *Organic Crop Breeding* Edith T. Lammerts van Bueren, James R. Myers, 2011-11-30 *Organic Crop Breeding* provides readers with a thorough review of the latest efforts by crop breeders and geneticists to develop improved varieties for organic production The book opens with chapters looking at breeding efforts that focus on specific valuable traits such as quality pest and disease resistance as well as the impacts improved breeding efforts can have on organic production The second part of the book is a series of crop specific case studies that look at breeding efforts currently underway from around the world in crops ranging from carrots to corn *Organic Crop Breeding* includes chapters from leading researchers in the field and is carefully edited by two pioneers in the field *Organic Crop Breeding* provides valuable insight for crop breeders geneticist crop science professionals researchers and advanced students in this quickly emerging field **BIOTECHNOLOGY - Volume VIII** Horst W. Agroecological Practices To Enhance Resilience Of Farming Systems Fabio Gresta, Moritz Von Cossel, Danilo Scordia, 2025-08-19 Resource over exploitation coupled with climate change has increased the urgency to act for preserving agroecosystems and their sustainability Unlike conventional agriculture agroecology addresses the current challenges of farming systems harnessing synergy with natural social and human resources in both time and space to produce food sustainably Several strategies addressing climate and environmental specific objectives call for agroecological practices to enhance the resilience of agroecosystems and to formulate transition pathways towards sustainable food systems In the coming decades the resilience of agriculture will be challenged by extreme climate change events such as increased temperature drought evapotranspiration and wind among others altering the conditions for cropland species This Research Topic will explore this hypothesis aiming to disseminate insights from research as evidence of the effectiveness of agroecological practices to enhance the resiliency of agroecosystems and counteract the detrimental effects of climate change

Good Crop/Bad Crop Devlin Kuyek, 2007-11-01 In recent years Canadians have become more and more concerned about the origins of their food and the environmental impacts of pesticides in agriculture What is less well known is that pesticide corporations such as Monsanto and DuPont have bought their way into the seed industry and are taking control of what was once the exclusive domain of farmers In Good Crop Bad Crop Devlin Kuyek deftly examines the economic and environmental background of the modern seed trade from a Canadian perspective Historically seeds were viewed more as public goods than as commodities and plant breeding objectives were widely shared by scientists governments and farmers Now that approach is changing seeds have become increasingly commodified and plant breeding has become subject to corporate priorities Farmers and citizens in Canada Kuyek points out need to heed the hard won lessons from the developing world where farmers greatly damaged by the much heralded approaches of the Green Revolution are now taking steps to reclaim control over seed supplies food security and their futures
