Return To The River Restoring Salmon To The Columbia River

**United States. Congress. House.
Committee on Resources.
Subcommittee on Fisheries
Conservation, Wildlife, and Oceans**

Return To The River Restoring Salmon To The Columbia River:

Return to the River Richard N. Williams, 2005-11-21 *Return to the River* will describe a new ecosystem based approach to the restoration of salmon and steelhead populations in the Columbia River once one of the most productive river basins for anadromous salmonids on the west coast of North America. The approach of this work has broad applicability to all recovery efforts throughout the northern hemisphere and general applicability to fisheries and aquatic restoration efforts throughout the world. The Pacific Northwest is now embroiled in a major public policy debate over the management and restoration of Pacific salmon. The outcome of the debate has the potential to affect major segments of the region's economy: river transportation, hydroelectric production, irrigated agriculture, urban growth, commercial and sport fisheries, etc. This debate, centered as it is on the salmon in all the rivers, has created a huge demand for information. The book will be a powerful addition to that debate. A 15-year collaboration by a diverse group of scientists working on the management and recovery of salmon, steelhead, trout, and wildlife populations in the Pacific Northwest. Includes over 200 figures with four color throughout the book. Discusses complex issues such as habitat degradation, juvenile survival through the hydrosystem, the role of artificial production, and harvest reform. Nez Perce Tribal Hatchery Program, Snake River, 1997 Return to the River, 1996

Wild Salmonids in the Urbanizing Pacific Northwest J. Alan Yeakley, Kathleen G. Maas-Hebner, Robert M. Hughes, 2013-11-20 Wild salmon, trout, char, grayling, and whitefish collectively salmonids have been a significant local food and cultural resource for Pacific Northwest peoples for millennia. The location, size, and distribution of urban areas along streams, rivers, estuaries, and coasts directly and indirectly alter and degrade wild salmonid populations and their habitats. Although urban and exurban areas typically cover a smaller fraction of the landscape than other land uses combined, they have profound consequences for local ecosystems, aquatic and terrestrial populations, and water quality and quantity.

Restoring America's Rivers Richard M. Robinson, 2025-07-02 The undamming and restoration of rivers is a major component of our broader environmental movement. There are ecological, economic, and social justice issues enveloped by initiatives involving river restorations, and it's time to focus our attention on these concerns. In this book, Richard M. Robinson reviews the removal of big concrete, big earthen, and low head dams along North America's larger and smaller rivers. Chapters highlight issues and contradictions related to dam safety, dam removals, and river restoration. The resulting book provides key insights into the economics and ecology of environmental restoration, our water resource management, and environmental justice. *Fishery Bulletin*, 2012 **National Marine Fisheries Service's Implementation of the Endangered Species Act** United States. Congress. House. Committee on Resources, 1998 Hearings on the Decision-making Processes and Interagency Cooperation of the National Marine Fisheries Service Northwest Region United States. Congress. House. Committee on Resources. Subcommittee on Fisheries Conservation, Wildlife, and Oceans, 1997

Fish and Wildlife Implementation Plan, 2003 **To Think Like a Mountain** Niels Sparre Nøkkentved, 2021-06-22

In the West shortsighted human self interest has resulted in devastating environmental losses The fur trade decimated beaver populations and streams and wetland ecosystems deteriorated Though most mining ceased by the late 1920s water running from the Pacific Mine nearly a century later still carried ten times the lead level standard set by the federal Clean Water Act Where grazing depleted native bunchgrasses fire prone cheatgrass grew in its place Migrating from Idaho streams salmon once reached the ocean in ten to fourteen days Now it takes fifty or more In 2016 a snowstorm blew a flock of snow geese off course They landed on contaminated water and about three thousand died Author Niels S Nokkentved takes a fresh look at environmental challenges affecting Northwest residents His essays examine cultural conflicts over resource extraction threats to watersheds from abandoned mines wolf recovery in the northern Rocky Mountains the lingering effects of livestock grazing on western rangelands and the rapidly disappearing sage grouse They discuss the importance of forest fires the value of beavers the failed promises of salmon hatcheries the reasons behind the decline of the timber industry in the Pacific Northwest and how unlikely allies learned to set aside their differences in order to resolve long standing disputes Nokkentved s goal is to encourage people to think like a mountain in other words to consider the long term consequences He shares his connection to each concern as well as his own evidence based perspective He believes that it most profits society collectively and as individuals when people respect the balance of nature and he wants to draw others to the same conclusion

Water in the West Jacqueline Vaughn, 2025-01-09 Water use and conservation in the American West have long been shaped by a host of geographic environmental political and economic factors Today though serious questions are being raised about how western states used dams irrigation systems and other water related infrastructure to transform the landscape of the West Are current trends in water consumption across the West sustainable given the region s arid environment and rapidly growing populations Are so called water wars between thirsty states and between Mexico and USA worsening What impact will climate change have on the West s limited water resources and the people who depend on them This book answers all those questions and more drawing on quantifiable facts and the knowledge and perspectives of experts on water resource consumption administration and conservation to provide a one stop resource for understanding the past present and future of water in the American West **Olympic National Park (N.P.), Elwha River Ecosystem Restoration**
