**No More Cancer** Gary Null, 2014-07-29 One word strikes more fear into a person's mind than any other CANCER The physical mental emotional and financial toll that comes with a cancer diagnosis is immense and affects not only cancer patients but also families and entire communities This year alone approximately 600 000 Americans will lose their lives to cancer and the forecast shows no signs of improving Recent estimates tell us that 41 percent of all Americans will be diagnosed with cancer during their lifetimes and 21 percent of the population will lose their lives to this devastating disease Cancer has evolved into a national crisis that touches each and every one of us The vast majority of individuals who lose the battle against cancer are treated with the standard orthodox therapy These people may never have questioned their oncologists believing that they were in the best possible hands with their physicians advanced education knowledge of latest treatments and all the tools of modern research at their disposal In this groundbreaking book Gary Null debunks the commonly accepted belief that drugs and chemotherapy are the only cures for cancer and explores the alternative treatments that most mainstream doctors will never discuss with their patients Dr Null asserts that there are foods and supplements that boost the body's immune system and can actually prevent and reverse cancer Did you know that eating lemons and melons can help balance your body's pH which will help prevent and treat cancer You knew that fiber is important for a healthy diet but did you know that it lowers the risk of breast colorectal uterine and prostate cancers Have you heard of maitake mushrooms which kill cancer cells by enhancing the activity of T helper cells In addition to diet Dr Null discusses important supplements and herbs and cutting edge therapies you may never have heard of With twenty five cancer fighting recipes and testimonials from individuals who have found health through Dr Null's methods this book could save your life **The**

**Cancer Odyssey** Margaret Brennan Bermel, MBA, 2011-03-10 Chemotherapy is the greatest fraud ever perpetrated upon the American public This statement must reach the public consciousness The Big Pharma FDA complex must be exposed as a cartel colluding not on curing cancer but on generating profits Does chemotherapy work Maybe sometimes with some specific cancers But very often it does not work The best weapon used in the war on cancer traces its genesis to mustard gas The cancer may die but the collateral damage is the patient's life Approximately 600 000 Americans die each year ostensibly from cancer but are they actually dying from treatment A very provocative question Bill Henderson interviews Margaret Bermel about her new book called The Cancer Odyssey Bill says I really enjoyed your book If everyone would read it BEFORE

they get the cancer diagnosis and go into fear orbit the millions of unnecessary cancer deaths would end Here is a direct link where you can listen to it or download it plain mp3 audio file [http://webtalkradio.net/s/billhenderson/tasksearch/How to Live Cancer Free The Cancer Odyssey by Margaret Bermel](http://webtalkradio.net/s/billhenderson/tasksearch/How%20to%20Live%20Cancer%20Free/The%20Cancer%20Odyssey%20by%20Margaret%20Bermel) *Cancer: 100 Ways to Fight* John Roberts, 2010-03-29 Cancer 100 Ways to Fight Your own attitude is your brightest guiding star Some of success is doing what you like to do But more of it is doing the things you don't like to do but must It is too easy to make an excuse and not do it and fail John Roberts As this book goes to press early in 2010 I am 75 and into my fifth year with incurable metastatic prostate cancer which had already spread to the bones before cancer was diagnosed and the prostate removed The statistical prognosis for the current treatments of choice is that one half of these patients will die within three years 75% within five This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness resumed cancer growth and the failure of bones or key organs I am still feeling fine no pain living a normal life and I have completed eight months of chemotherapy with a 63% drop in my PSA prostate cancer blood test without major side effects or rising PSA I have fought this cancer and its personal consequences in more than a hundred ways as described here Above all a lifetime of fitness and my current excellent physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease We cannot know which weapon or how much each one contributes to the extension of life so we must use them all The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights So I immediately started this book and organized my fight I was extremely unfortunate most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and

an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad *Spiritual Truths in Search for Higher Levels of Well-Being* Raul Llanos MD,2020-11-17 This book is an expression of the maturity of my vocation as a healer and my profession as a medical doctor that has given me the tools and the opportunity to find and to share more wellbeing in our lives If we become more conscious of our awareness we will be able to get in touch with an infinite capacity to create richer stages of being During the passages of my book I will share with you spiritual truths that I consider very important to be conscious in the pursue of higher stages of wellbeing Throughout the chapters of the book we will get in touch with our capacity to always expand our conscious reality I include concepts that will help us to be conscious of who we are and how to experience with more easiness and elegancy our holographic reality We explore concepts of the importance of been more in charge of our day and night dreams but mainly to be able to accept that we are experiencing a real illusion reality The power of forgiveness the love and the celebration of the gifts of life are also included with the main goal of helping us to be more aware of our capacity to consciously create our own reality To expand it in an un limited way all at our disposition You will be able to understand that always will be more and that we are a precious conscious gem who co creates precious gems realities

**One Nation Under Therapy** Christina Hoff Sommers,Sally Satel,2025-08-22 Americans have traditionally placed great value on self reliance and fortitude In recent decades however we have seen the rise of a therapeutic ethic that views Americans as emotionally underdeveloped psychically frail and requiring the ministrations of mental health professionals to cope with life s vicissitudes Being in touch with one s feelings and freely expressing them have become paramount personal virtues Today with a book for every ailment a counselor for every crisis a lawsuit for every grievance and a TV show for every conceivable problem we are at risk of degrading our native ability to cope with life s challenges Drawing on established science and common sense Christina Hoff Sommers and Dr Sally Satel reveal how therapism and the burgeoning trauma industry have come to pervade our lives Help is offered everywhere under the presumption that we need it in children s classrooms the workplace churches courtrooms the media the military But with all the help comes a host of troubling consequences including The myth of stressed out homework burdened hypercompetitive and depressed or suicidal schoolchildren in need of therapy and medication The loss of moral bearings in our approach to lying crime addiction and other foibles and vices The unasked for grief counselors who descend on bereaved families schools and communities following a tragedy offering dubious advice while billing plenty of money The expansion of Post Traumatic Stress Disorder from an affliction of war veterans to nearly everyone who has experienced a setback Intelligent provocative and wryly
