Return To Reason :

Return to Reason Stephen Edelston Toulmin, 2009-06-30 Stephen Toulmin argues that the potential for reason to improve our lives has been hampered by a serious imbalance in our pursuit of knowledge The centuries old dominance of rationality has diminished the value of reasonableness Toulmin issues a powerful call to redress the balance between rationality and reasonableness

Now Don't Try to Reason with Me Wayne C. Booth, 1970 In this entertaining collection of essays Wayne Booth looks for the much maligned middle ground for reason a rhetoric that can unite truths of the heart with truths of the head and allow us all to discover shared convictions in mutual inquiry First delivered as lectures in the 1960s when Booth was a professor at Earlham College and the University of Chicago *Now Don't Try to Reason with Me* still resounds with anyone struggling for consensus in a world of us versus them Professor Booth's earnestness is graced by wit irony and generous humor Louis Coxe *New Republic*

Listening to Reason in Plato and Aristotle Dominic Scott, 2020 Plato and Aristotle used moral philosophy to influence the way people actually live Focusing on the *Republic* and the *Nicomachean Ethics* this book examines how far they thought it could succeed in this

Farewell to Reason Paul Feyerabend, 2020-05-05 Farewell to Reason offers a vigorous challenge to the scientific rationalism that underlies Western ideals of progress and development whose damaging social and ecological consequences are now widely recognized For all their variety in theme and occasion the essays in this book share a consistent philosophical purpose Whether discussing Greek art and thought vindicating the church's battle with Galileo exploring the development of quantum physics or exposing the dogmatism of Karl Popper Feyerabend defends a relativist and historicist notion of the sciences The appeal to reason he insists is empty and must be replaced by a notion of science that subordinates it to the needs of citizens and communities Provocative polemical and rigorously argued Farewell to Reason will infuriate Feyerabend's critics and delight his many admirers

Space to Reason Markus Knauff, 2013 An argument against the role of visual imagination in reasoning that proposes a spatial theory of human thought supported by empirical and computational evidence Many scholars believe that visual mental imagery plays a key role in reasoning In Space to Reason Markus Knauff argues against this view proposing that visual images are not relevant for reasoning and can even impede the process He also argues against the claim that human thinking is solely based on abstract symbols and is completely embedded in language Knauff proposes a third way to think about human reasoning that relies on supramodal spatial layout models which are more abstract than pictorial images and more concrete than linguistic representations He argues that these spatial layout models are at the heart of human thought even thought about nonspatial relations in the world For Knauff the visual images that we so often associate with reasoning are only in the foreground of conscious experience Behind the images the actual logical work is carried out by reasoning specific operations on these spatial layout models Knauff also offers a solution to the problem of indeterminacy in human reasoning introducing the notion of a preferred layout model which is one layout model among others that has the best chance of being mentally constructed and thus guides the further process of thought Knauff's space to reason theory covers the functional the algorithmic and the implementational level of analysis and is corroborated by psychological experiments functional brain imaging and computational modeling

Education and the Limits of Reason Peter Roberts, Herner Saeverot, 2017-07-06 In recent decades a growing body of educational scholarship has called into question deeply embedded assumptions about the nature value and consequences of reason Education and the Limits of Reason extends this critical conversation arguing that in seeking to investigate the meaning and significance of reason in human lives sources other than

non fiction educational or philosophical texts can be helpful Drawing on the work of Dostoevsky Tolstoy and Nabokov the authors demonstrate that literature can allow us to see how reason is understood and expressed contested and compromised by distinctive individuals under particular circumstances in complex and varied relations with others Novels plays and short stories can take us into the workings of a rational or irrational mind and show how the inner world of cognitive activity is shaped by external events Perhaps most importantly literature can prompt us to ask searching questions of ourselves it can unsettle and disturb and in so doing can make an important contribution to our educational formation An original and thought provoking work Education and the Limits of Reason offers a fresh perspective on classic texts by Dostoevsky Tolstoy and Nabokov and encourages readers to reconsider conventional views of teaching and learning This book will appeal to a wide range of academics researchers and postgraduate students in the fields of education literature and philosophy

Reason's Muse Geneviève Fraisse, 1994-05-28 The French Revolution proclaimed the equality of all human beings yet women remained less than equal in the new society The exclusion of women at the birth of modern democracy required considerable justification and by tracing the course of this reasoning through early nineteenth century texts Geneviève Fraisse maps a moment of crisis in the history of sexual difference Through an analysis of literary religious legal philosophical and medical texts Fraisse links a range of positions on women's proper role in society to specific historical and rhetorical circumstances She shows how the Revolution marked a sharp break in the way women were represented in language as traditional bantering about the war of the sexes gave way to serious discussions of the political and social meanings of sexual difference Following this discussion on three different planes the economical the political and the biological Fraisse looks at the exclusion of women against the backdrop of democracy's inevitable lie the affirmation of an equality so abstract it was impossible to concretely apply This study of the place of sexual equality in the founding moment of democracy offers insight into a persistent question whether female emancipation is to be found through the achievement of equality with men or in the celebration of female difference

The History of Reason in the Age of Madness John Iliopoulos, 2017-07-27 The History of Reason in the Age of Madness revolves around three axes the Foucauldian critical historical method its relationship with enlightenment critique and the way this critique is implemented in Foucault's seminal work History of Madness Foucault's exploration of the origins of psychiatry applies his own theories of power truth and reason and draws on Kant's philosophy shedding new light on the way we perceive the birth and development of psychiatric practice Following Foucault's adoption of limit attitude which investigates the limits of our thinking as points of disruption and renewal of established frames of reference this book dispels the widely accepted belief that psychiatry represents the triumph of rationalism by somehow conquering madness and turning it into an object of neutral scientific perception It examines the birth of psychiatry in its full complexity in the late eighteenth century doctors were not simply rationalists but also alienists philosophers of finitude who recognized madness as an experience at the limits of reason introducing a

discourse which conditioned the formation of psychiatry as a type of medical activity Since that event the same type of recognition the same anthropological confrontation with madness has persisted beneath the calm development of psychiatric rationality undermining the supposed linearity absolute authority and steady progress of psychiatric positivism Iliopoulos argues that Foucault's critique foregrounds this anthropological problematic as indispensable for psychiatry encouraging psychiatrists to become aware of the epistemological limitations of their practice and also to review the ethical and political issues which madness introduces into the apparent neutrality of current psychiatric discourse *Stand to Reason* Radey Leavy, 2013-06 In frustration an anonymous Black man once said If there are so many damn churches in this community why ain't we seein God That is a very compelling question with many explanations ranging from conspiracies to politics to the same ol tiring rants that most people are tired of hearing albeit true or not This book will not dig into these assumptions nor place blame on anyone The object of this book is to take a more spiritual approach to the question at hand and show by the bible why events are unfolding the way they are In short Black people do not fully know their relationship to the God of the bible thus this book will serve as a definitive guide for Blacks in the bible This guide is intended for the person who is earnestly searching for a deeper scriptural understanding of their spiritual position according to the bible Hopefully this guide will lead one to search for deeper truths and follow up with actions that benefit themselves and those around them

The Affirmations of Reason Sigurd Baark, 2018-01-08 This book examines the speculative core of Karl Barth's theology reconsidering the relationship between theory and practice in Barth's thinking A consequence of this reconsideration is the recognition that Barth's own account of his theological development is largely correct Sigurd Baark draws heavily on the philosophical tradition of German Idealism arguing that an important part of what makes Barth a speculative theologian is the way his thinking is informed by the nexus of self consciousness reason and freedom which was most fully developed by Kant Fichte and Hegel The book provides a new interpretation of Barth's theology and shows how a speculative understanding of theology is useful in today's intellectual climate

An account of reason & faith: in relation to the mysteries of Christianity John Norris, 1724 **An Account of Reason and Faith** John Norris, 1740 **Abyss of Reason**

Daniel Cottom, 1991 A study from the American perspective of modern spiritualism which flourished in the mid 19th century and of surrealism a movement that produced a major following between the two World Wars **The Rhetoric of Reason**

James Crosswhite, 1996-02-15 Students must learn not only how to construct an argument but the purposes responsibilities and consequences of engaging in one *The Vocation of Reason* H. T. Wilson, 2004 This book addresses and at the same time reflects the impact of Max Weber on both the social sciences and on critical theory's critique of the social sciences

Weber's conception of vocation is a guiding thread unifying concerns about the nature scope and limits of theoretical thinking among social scientists whether supportive or critical of Weber Not surprisingly the source of many of these concerns whether intended or unintended biographical or situational is the ambiguous legacy of Weber himself Wilson's

interrogation of Weber's thought in articles and essays over the past 30 years supplemented by Kemple's insights makes a strong case for the claim that we do indeed live in the age of Weber

Phenomenology and the Human Positioning in the Cosmos Anna-Teresa Tymieniecka, 2012-10-11

The classic conception of human transcendental consciousness assumes its self-supporting existential status within the horizon of life world nature and earth. Yet this assumed absoluteness does not entail the nature of its powers neither their constitutive force. This latter call for an existential source reaching beyond the generative life world network. Transcendental consciousness having lost its absolute status its point of reference it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all establishing an original foundation of phenomenology in the primogenital onto-poiesis of life.
