Reusable Launch Vehicle Technology Development And Test Program:

Reusable Launch Vehicle Committee on Reusable Launch Vehicle Technology and Test Program, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1996-01-22 The key to opening the use of space to private enterprise and to broader public uses lies in reducing the cost of the transportation to space More routine affordable access to space will entail aircraft like quick turnaround and reliable operations Currently the space Shuttle is the only reusable launch vehicle and even parts of it are expendable while other parts require frequent and extensive refurbishment NASA s highest priority new activity the Reusable Launch Vehicle program is directed toward developing technologies to enable a new generation of space launchers perhaps but not necessarily with single stage to orbit capability This book assesses whether the technology development test and analysis programs in propulsion and materials related technologies are properly constituted to provide the information required to support a December 1996 decision to build the X 33 a technology demonstrator vehicle and suggest as appropriate necessary changes in these programs to ensure that they will support vehicle feasibility goals Maintaining U.S. Leadership in Aeronautics National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Commission on Engineering and Technical Systems, Committee to Identify Potential Breakthrough Technologies and Assess Long-Term R&D Goals in Aeronautics and Space Transportation Technology, 1998-10-07 After the completion of the National Research Council NRC report Maintaining U S Leadership in Aeronautics Scenario Based Strategic Planning for NASA s Aeronautics Enterprise 1997 the National Aeronautics and Space Administration NASA Office of Aeronautics and Space Transportation Technology requested that the NRC remain involved in its strategic planning process by conducting a study to identify a short list of revolutionary or breakthrough technologies that could be critical to the 20 to 25 year future of aeronautics and space transportation These technologies were to address the areas of need and opportunity identified in the above mentioned NRC report which have been characterized by NASA s 10 goals see Box ES 1 in Aeronautics Space Transportation Technology Three Pillars for Success NASA 1997 The present study would also examine the 10 goals to determine if they are likely to be achievable either through evolutionary steps in technology or through the identification and application of breakthrough ideas concepts and technologies *Highlights in Space*, 2002 **Hearing on the NASA Space Shuttle and the Reusable Launch Vehicle Programs** United States. Rampino,1997 The United States is embarked on a journey toward maturity as a spacefaring nation One key step along the way is development of a reusable launch vehicle RLV The most recent National Space Transportation Policy August 1994 assigned improvement and evolution of current expendable launch vehicles to the Department of Defense while National Aeronautical Space Administration NASA is responsible for working with industry on demonstrating RLV technology The purpose of this study is to help ensure the US military especially the USAF is prepared to take advantage of RLVs should the NASA led effort to develop an RLV demonstrator prove successful The focus of this study is an explanation of how the US military could use RLVs by describing and analyzing two concepts of operations Four major conclusions resulted from the analysis First RLVs have military potential They can perform a variety of missions including responsive spacelift reconnaissance and strike However the economic feasibility of using RLVs for earth to earth transportation is questionable Second design choices for an operational RLV will have effects on risk cost capability and operations efficiency Trade offs will have to be made between NASA commercial and military requirements if all three parties are to use the same fleet of RLVs Third increased investment in propulsion technology development is warranted to ensure success Fourth the top priority for the RLV program even from the military s perspective should remain cheap and responsive access to space The research led to three recommendations First the US military should become a more active participant in the RLV program to ensure its requirements are defined and incorporated Second America should not pursue development of operational RLVs before the technology is ready **Exploring the Unknown: Accessing space** ,1995 *Space Transportation, Parts I-IV* United States.
