Review And Evaluation Of Alternative Chemical Disposal Technologies:

Review and Evaluation of Alternative Chemical Disposal Technologies Panel on Review and Evaluation of Alternative Chemical Disposal Technologies, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1996-11-29 In 1994 the National Research Council published Recommendations for the Disposal of Chemical Agents and Munitions which assessed the status of various alternative destruction technologies in comparison to the Army's baseline incineration system The volume's main finding was that no alternative technology was preferable to incineration but that work should continue on the neutralization technologies under Army consideration In light of the fact that alternative technologies have evolved since the 1994 study this new volume evaluates five Army chosen alternatives to the baseline incineration system for the disposal of the bulk nerve and mustard agent stored in ton containers at Army sites located in Newport Indiana and Aberdeen Maryland respectively The committee assessed each technology by conducting site visits to the locations of the technology proponent companies and by meeting with state regulators and citizens of the affected areas This volume makes recommendations to the Army on which if any of the five technologies has reached a level of maturity appropriate for consideration for pilot scale testing at the two affected sites

Nuclear Submarine Decontamination - Proceedings Of The International Seminar On Nuclear War And Planetary Emergencies - 22nd Session Klaus Goebel, 1998-07-08 Umbilical cord blood previously discarded has emerged as a new source of stem cells for hematologic reconstitution bone marrow failures and other hematologic deficiencies It has become increasingly clear that umbilical cord tissue contains unique stem cells of great potential for regenerative medicine Importantly umbilical cord blood is abundant can be banked and transported with ease and thus has an indisputable potential for future regenerative therapies Driven by a massive interest for regenerative medicine and ethically acceptable stem cell sources the scientific literature on umbilical cord stem cells has exploded This book provides a consolidated overview of basic translational as well as clinical research in academic institutions and industry on hematopoietic and mesenchymal stem cells

contained within umbilical cord tissue as well as other more recently discovered stem and precursor cells of not yet fully elucidated potential Although not discussed here umbilical cord cells have been successfully reprogrammed into pluripotent stem cells iPS opening the door for a vast array of applications with this abundant human material likely catapulting cord derived stem cells to the forefront of cell based regenerative medicine Suitable as a primer and reference book for medical fellows and researchers this book can also be used by students undergraduate and graduate as a starting point into the vast literature on stem cells and their potential Department of Defense Appropriations for Fiscal Year 1997 United States.
