Revision of the Nostocaceae with Cylindrical Trichomes (formerly Scytonemataceae and Rivulariaceae). Rationale for Sampling and Interpretation of Ecological Data in the Assessment of Freshwater Ecosystems Billy G. Isom, 1986 Algae and their Biotechnological Potential Feng Chen, Yue Jiang, 2013-03-09 Algae are important organisms that include seaweeds and a number of single celled and multicellular microscopic forms Algae are ubiquitous they inhabit almost everywhere including oceans freshwater bodies rocks soils and trees Man's uses of algae may date back to ancient times In recent decades there has been renewed interest in the utilization of algae as sources of health food and high value chemicals and pharmaceuticals and for aguaculture agriculture and wastewater treatment Nevertheless the biotechnological potential of algae is still far from fully exploited due to a lack of understanding of algal characteristics and culture systems as well as of advanced research techniques This book contains selected papers presented at the Fourth Asia Pacific Conference on Algal Biotechnology held in Hong Kong on 3 6 July 2000 Written by experts in the field this book provides a state of the art account of algal biotechnology research Topics range from use of algae in agriculture to environmental monitoring and protection from algal culture systems to production of high value chemicals and pharmaceuticals by algae and from algal product purification to gene transformation and regulations This book is intended for use by researchers and industrialists in the field of algal biotechnology It will also be an important reference for undergraduate and postgraduate students in biotechnology and food science as well as in biology in general

Vegetation and Production Ecology of an Alaskan Arctic Tundra Larry L. Tieszen, 2012-12-06 This volume on botanical research in tundra represents the culmination of four years of intensive and integrated field research centered at Barrow Alaska The volume summarizes the most significant results and interpretations of the pri mary producer projects conducted in the U S IBP Tundra Biome Program 1970 1974 Original data reports are available from the authors and can serve as detailed references for interested tundra researchers Also the results of most projects have been published in numerous papers in various journals The introduction provides a brief overview of other ecosystem components The main body presents the results in three general sections. The summary chapter is an attempt to integrate ideas and information from the previous papers as well as extant literature In addition this chapter focuses attention on pro cesses of primary production which should receive increased emphasis Although this book will not answer all immediate questions it hopefully will enhance future understanding of the tundra particularly as we have studied it in Northern Alaska Stromatolites M.R.
