Revisiting Childrens Rights 10 Years Of The Un Convention On The Rights Of The Child:

Do African Children Have Rights? Stephen Nmeregini Achiliu, 2010 The United Nations 1989 Convention on the Rights of the Child CRC constitutes a landmark in the development of international human rights law and reflects an historic turn in universal thinking about children and their rights Many children in Africa today face the future with a deep sense of uncertainty and foreboding Many have no hope of education and the issues of child trafficking sexual exploitation and child labour reflect a profound crisis of the family The current socio economic situation has radically changed the world views and the life expectations of the African child This book attempts to respond to some of the questions that could be asked to what extent have the provisions of the CRC been implemented in the national legislations of African States What effect have they had on children in Africa What mechanisms exist to prevent and sanction rights abusers Are children s rights in Africa reality or simply rhetoric

Revisiting Children's Rights Deirdre Fottrell, 2021-07-26 The UN Convention on the Rights of the Child passed in 1989 was the first universal treaty dedicated solely to the promotion and protection of the interests of children In its first decade the Convention achieved near universal ratification and is now the most widely ratified human rights treaty ever In addition as a consequence of its influence children s human rights have been mainstreamed and are now prioritised at all levels within the United Nations and other regional organisations This book provides the first comprehensive overview of the first decade of the Convention It also brings together leading scholars and activists who place the Convention in a wider context and revisit contemporary debates and controversies in children s rights to assess the extent to which these issues have been influenced by the Convention in its first decade

and international human rights perspective In an attempt to solve the problem posed by the perception that there is an unsolvable conflict between the right of women to work and their right to motherhood the author considers how these two sets of rights as protected under international human rights law can and should be recognised and promoted within the Libyan legal system Including first hand accounts of experiences of Libyan women the study voices their struggle for their rights as guaranteed by domestic law international conventions and Islam Providing a rare insight into a region striving to find its new identity the author assesses the adequacy of existing Libyan laws and where warranted offers proposals for legislative amendments to Libyan policy makers and its new Parliament at such a crucial time in the nation s history

What Is Right for Children? Karen Worthington, 2016-02-11 Combining feminist legal theory with international human rights concepts this book examines the presence participation and treatment of children in a variety of contexts Specifically through comparing legal developments in the US with legal developments in countries where the views that children are separate from their families and potentially in need of state protection are more widely accepted The authors address the role of religion in shaping attitudes about parental rights in the US with particular emphasis upon the fundamentalist belief in natural lines of familial authority Such beliefs have provoked powerful resistance in the US to human rights approaches that view the child as an independent rights holder and the state as obligated to provide services and protections that are distinctly child centred Calling for a rebalancing of relationships within the US family to become more consistent with emerging human rights norms this collection contains both theoretical debates about and practical approaches to granting positive rights to children

Children and the European Union Helen Stalford, 2012-08-14 This book examines in detail the status of children in the EU Drawing on a range of disciplinary perspectives including the sociology of childhood and human rights discourse it offers a critical analysis of the legal and policy framework underpinning EU children s rights across a range of areas including family law education immigration and child protection Traditionally children s rights at this level have been articulated primarily in the context of the free movement of persons provisions inevitably restricting entitlement to migrant children of EU nationality In the past decade however innovative interpretations of EU law by the Court of Justice coupled with important constitutional developments have prompted the development of a much more robust children s rights agenda This culminated in the incorporation of a more explicit reference to children s rights in the Lisbon Treaty followed by the Commission s launch in February 2011 of a dedicated EU Agenda to promote and safeguard the rights of the child The analysis presented in this book therefore comes at a pivotal point in the history of EU children s rights providing a detailed and critical overview of a range of substantive areas and making an important contribution to international children s rights studies

Children's Rights and the Minimum Age of Criminal Responsibility Don Cipriani, 2016-05-23 Children of

almost any age can break the law but at what age should children first face the possibility of criminal responsibility for their alleged crimes This work is the first global analysis of national minimum ages of criminal responsibility MACRs the international legal obligations that surround them and the principal considerations for establishing and implementing respective age limits Taking an international children s rights approach with a rich theoretical framework and the vitality of the UN Convention on the Rights of the Child this work maintains a critical perspective such as in challenging the assumptions of many children s rights scholars and advocates Compiling the age limits and statutory sources for all countries this book explains the broad historical origins behind most of them identifying the recurring practical challenges that affect every country and providing the first comprehensive evidence that a general principle of international law requires all nations regardless of their treaty ratifications to establish respective minimum age limits *Rights and Wrongs of Children's Work* M. F. C. Bourdillon,2010 Explores the place of labor in children s lives and child development By incorporating recent theoretical advances in childhood studies and in child development the authors argue for the need to re think assumptions that underlie current policies on child labor Proposes a new approach to promote the well being development and human rights of working children From publisher description [Military Training And Children In Armed Conflict](#) Jenny Kuper,2005 During recent armed conflicts such as those in Iraq the former Yugoslavia and Rwanda public attention was repeatedly caught by images of children both as civilians and as soldiers Those conflicts like so many others were vivid reminders that where there is armed conflict there are also almost always children Soldiers and officers fulfil many roles in relation to such children sometimes as combatants sometimes as humanitarian workers sometimes as protectors and or sometimes as enemies and abusers This book aims to address three main questions what are the obligations of officers of national armed forces in relation to children either civilians or combatants whom they or those under their command may encounter while participating in situations of armed conflict How realistic and achievable are these obligations How can compliance with them be encouraged monitored and or enforced The book examines these questions in the context of military training In doing so it has another inextricably linked aim to see if there are ways in which the training of officers can improve the protection of children in armed conflict situations in accordance with international law and policy It is intended for use particularly by those involved in training of national armed forces including officers themselves and members of governments non governmental organisations NGOs and inter governmental organisations It is hoped that it will also be of interest to lawyers academics and others concerned with child rights and related law and policy It contains examples of actual training materials that can be modified for use in different countries and contexts **Hearing the Voices of Children** Christine Hallett,Alan Prout,2003-12-16 The main theme of this book is the emergence of the child s voice and the implications of this for social policy across countries and continents **Handbook of Children's Rights** Martin D. Ruck,Michele Peterson-Badali,Michael Freeman,2016-12-08 While the notion of young people

as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults. In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self-determination. With contributions from a wide range of international scholars the Handbook of Children's Rights brings together research theory and practice from diverse perspectives on children's rights. This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms. Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child, evolving capacities of the child, states' rights versus children's rights, rights of children versus parental or family rights, children as citizens, children's rights versus children's responsibilities and balancing protection and participation. In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g. childhood studies, developmental psychology, sociology of childhood, anthropology and political science. The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis. This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth.

A Commentary on the United Nations Convention on the Rights of the Child, Article 17: Access to a Diversity of Mass Media Sources Sherry Sacino, 2012. It is part of the series A Commentary on the United Nations Convention on the Rights of the Child which provides an article-by-article analysis of all substantive organizational and procedural provisions of the CRC and its two Optional Protocols. For every article a comparison with related human rights provisions is made followed by an in-depth exploration of the nature and scope of State obligations deriving from that article. The series constitutes an essential tool for actors in the field of children's rights including academics, students, judges, grassroots workers, governmental, non-governmental and international officers. The series is sponsored by the Belgian Federal Science Policy Office.

International Refugee Law H?ne Lambert, 2017-07-05. The essays selected and reproduced in this volume explore how international refugee law is dynamic and constantly evolving. From an instrument designed to protect mostly those civilians fleeing the worse excesses of World War II the 1951 Refugee Convention has developed into a set of principles, customary rules and values that are now firmly embedded in the human rights framework and are applicable to a far broader range of refugees. In addition international refugee law has been affected by international humanitarian law and international criminal law and vice versa. Thus there is a reinforcing dynamic in the development of these complementary areas of law. At

the same time in recent decades states have shown a renewed interest in managing migration thereby raising issues of how to reconcile such interests with refugee protection principles In addition the emergence of concepts of participation and responsibility to protect promise to have an impact on international refugee law The Child in International Refugee Law
Jason M. Pobjoy, 2017-04-27 Children are the victims of some of the most devastating examples of state sanctioned and private human rights abuse In increasing numbers they are attempting to find international protection and are forced to navigate complex administrative and legal processes that fail to take into account their distinct needs and vulnerabilities The key challenges they face in establishing entitlement to refugee protection are their invisibility and the risk of incorrect assessment Drawing on an extensive and original analysis of jurisprudence of leading common law jurisdictions this book undertakes an assessment of the extent to which these challenges may be overcome by greater engagement between international refugee law and international law on the rights of the child The result is the first comprehensive study on the manner in which these two mutually reinforcing legal regimes can interact to strengthen the protection of refugee children
