Revitalization and Internal Colonialism in Rural Japan Timo Thelen,2022-04-04 This book explores the decline of rural and peripheral areas in Japan which results from an aging population outmigration of the younger generations and the economic decline of the primary sector Based on extensive original research the book examines in detail the case of the Noto peninsula Allowing the locals to tell their stories describe their problems and come up with possible solutions the book demonstrates the serious impact of rural decline on their daily life and work and highlights the struggle to sustain rural living in the globalized age It argues that some recent innovations in global media economy technology and ideology offer scope for reversing the decline as some central government initiatives do but that these are not always noticed appreciated and made use of by local people The book also discusses the nature of the links between the peripheries and the centres regional national and global and how these often take the form of internal colonialism

Communication, Science, Technology, and Innovation in Disaster Risk Management Swapan Talukdar,Ranit Chatterjee,Somnath Bera,Atish Prashar,Rajib Shaw,2025-03-24 This book presents the three pillars of Disaster Risk Management DRM communication innovation and science and technology These three pillars are applied across five dimensions namely risk identification and reduction preparedness financial protection resilient recovery and risk informed investments in South Asia In the coming decades the region will experience rapid economic development and population growth which combined with the effects of climate change will increase the likelihood of being affected by hazards As hazards can negatively impact every sector of the economy and undo years of economic progress effective measures to reduce the risk must be incorporated into development plans and poverty reduction strategies Technological advances have opened up previously unimaginable opportunities to

strengthen resilience and improve communications In the South Asia it has been experienced that the prevention of hazards and the development of emergency plans enabled by advances in communications and space technology can be much more successful and significantly costly effective than in the past The use of space technology in disaster monitoring early warning and emergency response and for response has shown remarkable efficiency New approaches to Disaster Risk Management DRM are becoming more available due to recent advances in space and communication technology This book focuses on the use and innovation of space technology and communication for DRM in two specific areas the Early Warning System EWS and the Disaster Information Management System DIMS *Reviving the Spirit* Beverly Hall Lawrence,1997 Drawing on her own experiences and those of the parishioners of Baltimore s Bethel African Methodist Episcopal Church the author traces and celebrates the current renaissance of religious feeling among middle class blacks **The Paradox of Urban**

Revitalization Howard Gillette, Jr.,2022-06-07 In the twenty first century cities in the United States that had suffered most the shift to a postindustrial era entered a period widely proclaimed as an urban renaissance From Detroit to Newark to Oakland and elsewhere commentators saw cities rising again Yet revitalization generated a second urban crisis marked by growing inequality and civil unrest reminiscent of the upheavals associated with the first urban crisis in the mid twentieth century The urban poor and residents of color have remained very much at a disadvantage in the face of racially biased capital investments narrowing options for affordable housing and mass incarceration In profiling nine cities grappling with challenges of the twenty first century author Howard Gillette Jr evaluates the uneven efforts to secure racial and class equity as city fortunes have risen Charting the tension between the practice of corporate subsidy and efforts to assure social justice The Paradox of Urban Revitalization assesses the course of urban politics and policy over the past half century before the COVID 19 pandemic upended everything and details prospects for achieving greater equity in the years ahead

Collaborative Governance for Urban Revitalization Michael J. Rich,Robert P. Stoker,2014-05-29 For more than one hundred years governments have grappled with the complex problem of how to revitalize distressed urban areas In 1995 the original urban Empowerment Zones Atlanta Baltimore Chicago Detroit New York and Philadelphia each received a 100 million federal block grant and access to a variety of market oriented policy tools to support the implementation of a ten year strategic plan to increase economic opportunities and promote sustainable community development in high poverty neighborhoods In Collaborative Governance for Urban Revitalization Michael J Rich and Robert P Stoker confront the puzzle of why the outcomes achieved by the original Empowerment Zones varied so widely given that each city had the same set of federal policy tools and resources and comparable neighborhood characteristics The authors analysis based on more than ten years of field research in Atlanta and Baltimore and extensive empirical analysis of EZ processes and outcomes in all six cities shows that revitalization outcomes are best explained by the quality of local governance Good local governance makes positive contributions to revitalization efforts while poor local governance retards progress While policy design and

contextual factors are important how cities craft and carry out their strategies are critical determinants of successful revitalization Rich and Stoker find that good governance is often founded on public private cooperation a stance that argues against both the strongest critics of neoliberalism who see private enterprise as dangerous in principle and the strongest opponents of liberalism who would like to reduce the role of government *Revitalization and the U.S. Economy* United States.
