Poor Relief in 18th and 19th Century Southern Europe Ole Peter Grell, 2017-07-05 The poor and the sick poor have always presented a problem to the governments and churches of Europe Whose responsibility are they Are they a wilful burden on the honest working population or are they a necessary presence for the true Christian to live the true Christian life In the 18th and 19th centuries what happened to the poor and the sick poor in the north and south of Europe was different In the north there occurred first the Reformation in the 16th century which changed attitudes to the poor and then the advent of industrialisation with its far reaching effects of pauperisation of people both in town and countryside In the Catholic south where industrialisation did not appear so soon the Catholic Church introduced a programme of reform at all levels but along traditional lines This included the founding of new orders dedicated to the care of the poor and sick of new institutions within which to house and care for them At all times it was taken for granted that it was a necessary aspect of being a Christian that one should give for the care of the needy and that this was not the duty of the state or of secular institutions The secularising movement did however reach the southern countries by way both of the Enlightenment and more drastically in the form of the Napoleonic invasions But after the defeat of Napoleon the Church reasserted its right to administer and control the support of the poor and sick and this situation continued until 1900 in most areas Moreover the effects of industrialisation and the concomitant increase in population did make itself felt in the south in the course of the 19th century which put great stress on the institutions for poor relief and health care for the poor All this is still relevant today since the situations that governments and the Catholic Church found themselves confronted with and the stark choices they had to make are being replayed to some extent today Who is responsible for the poor who is to blame for their being poor How should their poverty be relieved how should the health care of the many be funded These are still live issues today While complete in itself the present volume also forms the fourth and last of a four volume survey of health care and poor relief in Europe between 1500 and 1900 edited by Ole Peter Grell and Andrew Cunningham

Community Health Bechara Choucair, 2020-05-28 When Bechara Choucair was a young doctor he learned an important lesson treating a patient for hypothermia does little good if she has to spend the next night out in the freezing cold As health commissioner of Chicago he was determined to address the societal causes of disease and focus the city's resources on its most vulnerable populations That targeted approach has led to dramatic successes such as lowering rates of smoking teen pregnancy breast cancer mortalities and other serious ills In Precision Community Health Choucair shows how those successes can be replicated and expanded around the country The key is to use advanced technologies to identify which

populations are most at risk for specific health threats and avert crises before they begin Big data makes precision community health possible But in our increasingly complex world we also need new strategies for developing effective coalitions media campaigns and policies This book showcases four innovations that move public health departments away from simply dispensing medical care and toward supporting communities to achieve true well being The approach Choucair pioneered in Chicago requires broadening our thinking about what constitutes public health It is not simply about access to a doctor but access to decent housing jobs parks food and social support It also means acknowledging that a one size fits all strategy may exacerbate inequities By focusing on those most in need we create an agenda that is simultaneously more impactful and more achievable The result is a wholesale change in the way public health is practiced and in the well being of all our communities

The Redesign of the Global Financial Architecture Stuart P. M. Mackintosh, 2020-10-29 More than ten years on from the most intense phase of the global financial crisis and the collective international response in the G20 summit in London a new normal has emerged with systems in place to mitigate against further banking crises This updated new edition analyzes this post crisis international and national regulatory framework and asks whether the current paradigm is fit for purpose as new dangers gestate and develop This new edition includes a discussion of the impact of the aggressively deregulatory and anti globalist policies of the Trump administration and its pursuit of an America First policy and explores its implications for the regulatory landscape constructed and tended by previous leaders The author addresses new and future systemic risks many outside the regulated banking sector which have grown in importance since 2015 He develops possible future scenarios for the international regulatory architecture both negative and positive asking Are we better prepared for future banking crises New risks including the COVID 19 pandemic and economic crash are testing the global system and the G20 without US leadership may be failing in this latest most severe crisis of our lifetimes This book provides a unique narrative explanation drawn from leading actors of key events and policy changes as they unfolded immediately post crisis The author builds upon the first edition to capture key developments that have occurred during the past five years while raising key questions and vulnerabilities and looking at future risks and challenges that may emerge This text will be of great interest to students teachers and researchers of financial frameworks globalisation and political economy
