The Sea Shore (Classic Reprint) W. S. Furneaux, 2015-08-05 Excerpt from *The Sea Shore* To sea side naturalists it must be a matter of great surprise that of the inhabitants of our coast towns and villages and of the pleasure seekers that swarm on various parts of the coast during the holiday season so few take a real interest in the natural history of the shore The tide flows and ebbs and the restless waves incessantly roll on the beach without arousing a thought as to the nature and cause of their movements The beach itself teems with peculiar forms of life that are scarcely noticed except when they disturb the peace of the resting visitor The charming vegetation of the tranquil rock pool receives but a passing glance and the little world of busy creatures that people it are scarcely observed while the wonderful forms of life that inhabit the sheltered nooks of the rugged rocks between the tide marks are almost entirely unknown except to the comparatively few students of Nature So general is this apparent lack of interest in the things of the shore that he who delights in the study of littoral life and scenes but seldom meets with a kindred spirit while following his pursuits even though the crowded beach of a popular resort be situated in the immediate neighbourhood of his hunting ground About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such

described both as individual species and as components of a rich mosaic of life The factors of pollution and development that are destroying the diversity of the rich complex of shores are described **The Sea-shore** William Plane Pycraft,2019-03-26
