Gloster Meteor in British Service Martin Derry,Neil Robinson,2018-11-30 The Gloster F 9 40 was Britains first jet fighter and as the Meteor F I became the first jet powered aircraft of any description to enter service with the Allies in World War II Several early Meteors were dispatched to Europe in the hope that 1945 might witness the first ever jet on jet combats between it and the much vaunted German jets a contest which in the event was never to occur Postwar and the Meteor quickly became the backbone of the UKs day fighter defenses progressing through successive Marks as it did so until finally

being replaced on the front line by later types during the mid 1950s With their ever adaptable airframe two seat Meteors became Britains primary night fighter too serving for several years until replaced by the Gloster Javelin from the late 1950s onwards With its operational career over the Meteors adaptability and ruggedness was put to sterling use as an advanced trainer the most obvious example of which was the T 7 As late as 1982 a handful of stalwarts were still soldiering on Although space precludes a comprehensive history of such a prolific aircraft it is hoped that both aviation enthusiasts and aircraft modelers may find some interesting examples in these pages and sufficient inspiration to help them choose which color scheme to finish their latest Meteor model in This latest addition to the FlightCraft range follows our well established format in that it is split into three primary sections The first covers the Meteor using numerous photographs informative captions and tables The second is a 16 page full color illustration section featuring detailed profiles and 2 views of many of the color schemes and markings carried by British Meteors The final section lists as many injection moulded plastic model kits of the Meteor in all the major scales that the authors could obtain plus a gallery of models made by some of the UKs best modelers

Avro Shackleton Martin Derry,Neil Robinson,2015-11-30 Initially projected as a maritime reconnaissance version of the Lincoln bomber itself a development of the famous wartime Lancaster which saw post war service in a General Maritime Reconnaissance role see Flight Craft No 4 the Avro Shackleton named after the polar explorer Sir Ernest Shackleton was a completely new design powered by four Rolls Royce Griffon 57 engines driving six blade contra rotating propellers Split into three main sections this latest Flight Craft title perfectly timed to coincide with the release of the first examples of the eagerly awaited new tool 1 72 scale Airfix kit offers a concise history of the Shackleton s development and operational career from the prototype and initial entry in to RAF service in 1951 and its use with the South African Air Force the only other operator of the type Section 1 chronicles its design ongoing improvements and development through the three main Marks in both the Maritime Reconnaissance and Airborne Early Warning roles until its retirement after four decades of RAF service in 1991 which includes scores of contemporary photographs with detailed captions many of which have never been seen in print before This is followed by a 16 page colour illustration section featuring profiles and 2 views of the colour schemes and markings carried by the type in RAF and SAAF service The final section lists all the plastic

model kits accessories and decal sheets produced of the Shackleton in all scales As with the other books in the Flight Craft series whilst published primarily with the scale aircraft modeller in mind it is hoped that those readers who might perhaps describe themselves as occasional modellers may also find that this colourful and informative work offers something to provoke their interests too Combat Codes Vic Flintham, Andrew Thomas, 2008-07-15 The authors of Combat Codes have painstakingly researched the codes used by the RAF to replace unit markings during World War II in order to attempt to confuse the enemy **Ecology of Marine Ports of the Black and Azov Sea Basin** A.
