Searching For The Secrets Of Nature:

Searching for the Secrets of Nature Simon Varey, Rafael Chabrán, 2000 This collection of essays by historians of science and medicine and literary and textual scholars from several countries analyzes the achievements of Dr Francisco Hernández 1515-87 author of the monumental *The Natural History of New Spain* in the history of medicine and science in Europe and the Americas

Science and the Secrets of Nature William Eamon, 2020-06-30 By explaining how to sire multicolored horses produce nuts without shells and create an egg the size of a human head Giambattista Della Porta's *Natural Magic* 1559 conveys a fascination with tricks and illusions that makes it a work difficult for historians of science to take seriously Yet according to William Eamon it is in the how to books written by medieval alchemists magicians and artisans that modern science has its roots These compilations of recipes on everything from parlor tricks through medical remedies to wool dyeing fascinated medieval intellectuals because they promised access to esoteric secrets of nature In closely examining this rich but little known source of literature Eamon reveals that printing technology and popular culture had as great if not stronger an impact on early modern science as did the traditional academic disciplines

Women, Imagination and the Search for Truth in Early Modern France Rebecca M. Wilkin, 2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public

Translating Nature Jaime Marroquin Arredondo, Jaime Marroquín Arredondo, Ralph Bauer, 2019-05-10 Translating Nature recasts the era of early modern science as an age not of discovery but of translation As Iberian and Protestant empires expanded across the Americas colonial travelers encountered translated and reinterpreted Amerindian traditions of knowledge knowledge that was later translated by the British reading from Spanish and Portuguese texts Translations of natural and ethnographic knowledge therefore took place across multiple boundaries linguistic cultural and geographical and produced through their transmissions the discoveries that characterize the early modern era In the process however the identities of many of the original bearers of knowledge were lost or hidden in translation The essays in Translating Nature explore the crucial role that the translation of philosophical and epistemological ideas played in European scientific exchanges with American Indians the ethnographic practices and methods that facilitated appropriation of Amerindian knowledge the ideas and practices used to record

organize translate and conceptualize Amerindian naturalist knowledge and the persistent presence and influence of Amerindian and Iberian naturalist and medical knowledge in the development of early modern natural history Contributors highlight the global nature of the history of science the mobility of knowledge in the early modern era and the foundational roles that Native Americans Africans and European Catholics played in this age of translation Contributors Ralph Bauer Daniela Bleichmar William Eamon Ruth Hill Jaime Marroqu n Arredondo Sara Miglietti Luis Millones Figueroa Marcy Norton Christopher Parsons Juan Pimentel Sarah Rivett John Slater Science and Nature Carolyn Merchant,2017-11-07 Science and Nature brings together the work and insights of historian Carolyn Merchant on the history of science environmental history and ethics The book explores her ideas about the interconnections among science women nature and history as they have emerged over her academic lifetime Focusing on topics such as The Death of Nature the Scientific Revolution women in the history of science and environment and partnership ethics it synthesizes her writings and sets out a vision for the twenty first century Anyone interested in the interactions between science and nature in the past present and future will want to read this book It is an ideal text for courses on the environment environmental history history of science and the philosophy of science **The Early Modern Global South in Print** Sandra Young,2016-03-23 Early modern geographers and compilers of travel narratives drew on a lexicon derived from cartography s seemingly unchanging coordinates to explain human diversity Sandra Young s inquiry into the partisan knowledge practices of early modernity brings to light the emergence of the early modern global south Young proposes a new set of terms with which to understand the racialized imaginary inscribed in the scholarly texts that presented the peoples of the south as objects of an inquiring gaze from the north Through maps images and even textual formatting equivalences were established between new worlds many of them long known to European explorers she argues in terms that made explicit the divide between north and south This book takes seriously the role of form in shaping meaning and its ideological consequences Young examines in turn the representational methodologies or artes deployed in mapping the whole world illustrating creating charts for navigation noting down observations collecting and cataloguing curiosities reporting events formatting materials and editing and translating old sources By tracking these methodologies in the lines of beauty and evidence on the page we can see how early modern producers of knowledge were able to attribute alterity to the southern climes of an increasingly complex world while securing their own place within it **Vico and Joyce** Donald Phillip Verene,1987-07-01 Joyce said My imagination grows when I read Vico as it doesn t when I read Freud or Jung This volume is the first extended examination of the connections between Vico and Joyce Joyce employed Vico s New Science as the basis of Finnegans Wake as he employed Homer s Odyssey as the basis of Ulysses In what ways are Vico and Joyce similar To what extent is Vico an influence on Joyce And in what ways can Vico s philosophy be newly understood when seen in relation to Joyce s use of it This book suggests ways to see both thinkers anew Vico and Joyce is divided into three major parts Cycles and History in which Vico s famous conception

of the course and recourse of historical events is examined in relation to Joyce's use of this idea in *Finnegans Wake*. Joyce and Vico in which the relationship between the two thinkers is approached more from the side of Joyce than Vico. Language and Myth in which the similarities of Vico's and Joyce's grasp of language and imaginative forms of thought are considered. This book opens up a relationship and set of ideas whose time has come. In the last decade there has been an exciting renaissance in the study of Vico that originated in the English speaking world and spread back to Italy. Joyce has been the one major twentieth century figure through which most English readers have come to know something of Vico. To consider them together opens up new avenues for our understanding of the imagination, memory and the cyclic course of human history.
