The Aquaculture Controversy in Canada Nathan Young, Ralph Matthews, 2011-01-01 Aquaculture the farming of aquatic organisms is one of the most promising but controversial new industries in Canada Advocates believe aquaculture has the potential to solve environmental and food supply problems resulting from global overfishing Critics argue that industrial scale aquaculture poses unacceptable threats to human health local communities and the environment The Aquaculture Controversy in Canada is not about methods of aquaculture but rather an exploration of why the practice has been the centre of intense debate in Canada Nathan Young and Ralph Matthews present the controversy as rooted in local and global conflicts over risk development rights and knowledge The inability of the industry to address the controversy s complexities they argue has only fuelled the debate Comprehensive and balanced this book will appeal to anyone who wants a deeper understanding of one of the most contentious public policy and environmental issues facing the world today

Environmental Risks of Genetically Engineered Fish United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard, 2013 Coasts Under Stress Rosemary E. Ommer, 2007-08-08 Rosemary Ommer and her project team combine formal scientific natural and social and humanist analysis with an examination of the lived experience of coastal people They analyze community erosion created by economic decline and the ecosystem damage caused by unrelenting industrial pressure on natural resources and look at the history of coastal communities their resource bases their economies and the way the lives of people are embedded in their environments **Sea-silver** Betty Keller, Rosella M. Leslie, 1996 **Salmon Farming** Peter Andrew Robson, 2006 The first comprehensive agenda free book on the subject of BC s fish farming industry To date there has been little objective information on the topic and this book fills that void It includes history information and context that will equip experts lay readers and everyone in between with everything they need to know to develop an informed opinion about fish farms in BC Because of the polarised nature of the issue most information has been biased to a particular side The aquaculture industry and its government supporters say that fish farming makes good economic sense and is not an environmental threat Critics of the industry want salmon farming stopped they say it pollutes the ocean waters and is unsustainable that farmed fish will spread disease to wild fish and escaped fish will displace wild salmon Consumers and their questions have been lost in the middle of the controversy Is it safe to eat farmed salmon Does the industry harm the environment Will this practice threaten our wild fish stocks In this book Peter Robson explains the biology and the effects of salmon farming using a balanced approach supported by up to date information to shed an objective light on this important and contentious subject The Tragedy of the Commodity Stefano B. Longo, Rebecca Clausen, Brett Clark, 2015-06-25 Winner of the 2017 Paul Sweezy Marxist Sociology Book Award from the American Sociological Association Although humans have long depended on oceans and aquatic ecosystems for sustenance and trade only recently has human influence on these resources dramatically

increased transforming and undermining oceanic environments throughout the world Marine ecosystems are in a crisis that is global in scope rapid in pace and colossal in scale In *The Tragedy of the Commodity* sociologists Stefano B Longo Rebecca Clausen and Brett Clark explore the role human influence plays in this crisis highlighting the social and economic forces that are at the heart of this looming ecological problem In a critique of the classic theory the tragedy of the commons by ecologist Garrett Hardin the authors move beyond simplistic explanations such as unrestrained self interest or population growth to argue that it is the commodification of aquatic resources that leads to the depletion of fisheries and the development of environmentally suspect means of aquaculture To illustrate this argument the book features two fascinating case studies the thousand year history of the bluefin tuna fishery in the Mediterranean and the massive Pacific salmon fishery Longo Clausen and Clark describe how new fishing technologies transformations in ships and storage capacities and the expansion of seafood markets combined to alter radically and permanently these crucial ecosystems In doing so the authors underscore how the particular organization of social production contributes to ecological degradation and an increase in the pressures placed upon the ocean The authors highlight the historical political economic and cultural forces that shape how we interact with the larger biophysical world A path breaking analysis of overfishing *The Tragedy of the Commodity* yields insight into issues such as deforestation biodiversity loss pollution and climate change Steveston Cannery Row Mitsuo Yesaki, Harold Steves, Kathy Steves, 2005 *The Sunshine Coast* Rosella M.
