Looking at Violence in the Nordic Countries Jukka-Pekka Takala, Yaira Obstbaum, Nordic Council of Ministers, 2009 This report reviews and discusses violence statistics and their problems and possible improvements from various angles The report is based on the work of the statistical subproject of the Nordic Project on Violence Violence and its reduction in the Nordic countries V ld och v ldsreducering i Norden financed by the Nordic Council of Ministers and carried out by the Nordic councils for crime prevention and the Scandinavian Research Council for Criminology The Statistics Subproject was to look at three related but originally separate subprojects of the original overall plan 1 To describe and compare violence with the help of extant statistics 2 To chart variations in violence in the Nordic countries 3 To develop instruments of measuring violence in intimate relations including violence in the family With the resources available the subproject was unable to carry out any of these tasks in a truly systematic and comprehensive manner However we hope that the variable material we were able to produce on all these themes can contribute to better accounting for violence and be of help when devising methods for preventing violence The report describes levels and trends in violence It touches on problems and solutions in their measurement Some suggestions are tentative others are more firmly established and the reader can turn to the research and web pages that are referred to in the reports Global Aging Crisis United States. Growth Great Britain: Parliament: House of Lords: European Union Committee,2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile
