nation's industrial slaughterhouses Lehman demystifies the cowboy life by describing the origins of the cattle drive and the extensive planning complicated logistics great skill and good luck essential to getting the cows to market He reveals how drives figured into the larger story of postwar economic development and traces the complex effects the cattle business had on the environment He also explores how the premodern cowboy became a national hero who personified the manly virtues of rugged individualism and personal independence Grounded in primary sources this absorbing book takes advantage of recent scholarship on labor race gender and the environment The lively narrative will appeal to students of Texas and western history as well as anyone interested in cowboy culture **Riding for the Lone Star** Nathan A.

The Graphic Novel Jan Baetens,2001 The essays collected in this volume were first presented at the international and interdisciplinary conference on the Graphic Novel hosted by the Institute for Cultural Studies University of Leuven in 2000 The issues discusses by the

conference are twofold Firstly that of trauma representation an issue escaping by definition from any imaginable specific field Secondly that of a wide range of topics concerning the concept of visual narrative an issue which can only be studied by comparing as many media and practices as possible The essays of this volume are grouped here in two major parts their focus depending on either a more general topic or on a very specific graphic author The first part of the book Violence and trauma in the Graphic Novel opens with a certain number of reflections on the representation of violence in literary and visual graphic novels and continues with a whole set of close readings of graphic novels by Art Spiegelman Maus I and II and Jacques Tardi whose masterwork C tait la guerre des tranch es is still waiting for its complete English translation The second part of the book presents in the first place a survey of the current graphic novel production and insists sharply on the great diversity of the range in the various continental traditions for instance underground comix and feminist comics high art graphic novels critical superheroes fiction whose separation is nowadays increasingly difficult to maintain It continues and ends with a set of theoretical interventions where not only the reciprocal influences of national and international traditions but also those between genres and media are strongly forwarded the emphasis being here mainly on problems concerning ways of looking and positions of spectatorship The Historical Background of Texas Water Law Hans Wolfgang
