Jesus and the Lost Goddess Timothy Freke, Peter Gandy, 2011-08-10 Why Were the Teachings of the Original Christians Brutally Suppressed by the Roman Church Because they portray Jesus and Mary Magdalene as mythic figures based on the Pagan Godman and Goddess Because they show that the gospel story is a spiritual allegory encapsulating a profound philosophy that leads to mythical enlightenment Because they have the power to turn the world inside out and transform life into an

exploration of consciousness Drawing on modern scholarship the authors of the international bestseller *The Jesus Mysteries* decode the secret teachings of the original Christians for the first time in almost two millennia and theorize about who the original Christians really were and what they actually taught In addition the book explores the many myths of Jesus and the Goddess and unlocks the lost secret teachings of Christian mysticism which promise happiness and immortality to those who attain the state of Gnosis or enlightenment This daring and controversial book recovers the ancient wisdom of the original Christians and demonstrates its relevance to us today

Cosmos and Character in Paradise Lost M. Sarkar, 2012-06-08 This book offers a fresh contextual reading of *Paradise Lost* that suggests that a recovery of the vital intellectual ferment of the new science magic and alchemy of the seventeenth century reveals new and unexpected aspects of Milton's cosmos and chaos and the characters of the angels and Adam and Eve After examining the contextual references to cabalism hermeticism and science in the invocations and in the presentation of chaos and Night the book focuses on the central stage of the epic action Milton's unique cosmos at once finite and infinite with its re-orientation of compass points While Milton relies on the new astronomy optics and mechanics in configuring his cosmos he draws upon alchemy to suggest that the imagined prelapsarian cosmos is the crucible within which vital re-orientations of authority could have taken place

[The origin of the cosmos](#) Antonio Pinto Renedo, 2022-01-04 First of all I would like to emphasize that the objective of this book is not to study the universe in a classical or materialistic way but rather to explain all its most important aspects but analyzed from a philosophical or metaphysical point of view It is true that it represents a bold description of the cosmos but this is better than simply denying all soul in matter as materialistic scientists do when they claim that the origin of all material phenomenon without consciousness is another material phenomenon without consciousness of itself It is surprising that there are so many

universities and physics specialists at present yet very few wonder what the real reason for their behavior is or if they are aware of what they are doing But materialistic scientists who deny the soul to people or matter always evasively answer that question saying that if matter and its particles react to the stimuli they receive it is because of other smaller particles but they always try to avoid it The true answer because if matter reacts and acts in this way it is simply because it is alive even if it is in a different way from what biologists call life because it is life even if it is mineral and not organic I would also like this book to serve to find a common point of understanding between the most spiritualistic ancient philosophy and the modern materialistic mentality that helps to understand the part of reason that each one has because it is so unscientific to deny the existence of the spirit or the life of matter as insisting on saying that ancient legends and superstitions are absolute truths The problem of contemporary society is that it lacks moral leadership which causes social anarchy this is due to the fact that religious organizations refuse to adapt to the times for fear that these changes will make them lose their power because if they accept changes in their fundamental ideas that would show that they are not infallible as they would have us believe This is arrogant behavior because they do not want to accept that many of the things in the world are outside of what they believe or understand simply because when their religions were founded they were not yet known This attitude causes a separation between science and religion that can only be redirected through moral renewal In reality spiritualism begins where materialism ends therefore scientists will never be able to understand the intimate reality of matter if they do not accept to analyze it from a spiritual point of view It must be borne in mind that a society that only relies on the material aspects of life but despises the spiritual ones is like a farmer who tries to make plants grow only with soil but without water it is evident that in this way it will fail With this book I have tried to answer in a single book the main philosophical questions that throughout history have confused humanity I have also tried to use clear and direct language so that readers do not have too many difficulties in understand its content I hope you find it useful

SPACE DEREK. LIU,2024 [The Pursuit of Happiness and the American Regime](#) Elizabeth Amato,2018-02-28 The Declaration of Independence claims that individuals need liberty to pursue happiness but provides little guidance on the what of happiness Happiness studies and liberal theory are incomplete guides Happiness studies offer insights into what makes people happy but happiness policy risks becoming doctrinaire Liberal theory is better on personal liberty but weak on the what of happiness My argument is that American novelists are surer guides on the pursuit of happiness Treated as political thinkers my book offers a close reading of four American novelists Tom Wolfe Walker Percy Edith Wharton and Nathaniel Hawthorne and their critique of the pursuit of happiness With a critical and friendly eye they present the shortcomings of pursuing happiness in a liberal nation but also present alternatives and correctives possible in America Our novelists point us toward each other in friendship as our greatest resource to guide us towards happiness
