Shearin Karres, 2001 Make Your Kids Smarter is chock full of drills tips and exercises to enhance children's learning The skill builders encompass areas ranging from general school smarts to library use computer literacy to study skills writing and verbal skills to strategic thinking Devoted parents will use this book to give their kids the advantage that will make all the difference Dr Karres both a parent and an educator understands the busy and often stressful lifestyles of today's parents Parent pointers FYI explanations and guided minilessons are all included to make the parents job a little bit easier and a little less time consuming Parents will be able to thumb through this manual isolate the exercises that will benefit their child the most and get right to it Ready read action It's that simple This is a must have manual for all parents who believe their children deserve the very best *The Teacher's Guide to Intervention and Inclusive Education* Glynis Hannell, 2015-11-17 Enables educators to quickly identify individual student's difficulties and strengths and then target intervention directly where it is needed **Etude Music Magazine** Theodore Presser, 1894 Includes music *Arithmetic Counts!* Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught

hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget
