*Making a Garden on a Greek Hillside* Mary Jaqueline Tyrwhitt, 1998 The hillsides of Attica are stony and arid Over grazed in the past by goats and sheep they have few trees and are covered in dense pickly scrub Relentless sun and often strong winds prevail for five months of the year and in the spring and autumn months the miracle of the extraordinary variety and beauty of the Greek flora is revealed to the discerning eye It was on such a hillside that the author a Harvard University professor chose to make a garden This book is the story of the making of that garden and a distillation of what she learnt and observed about the plants both native and introduced she grew there a book which she wrote to assist other people wishing to make gardens in places with a Mediterranean climate believing that anything that grew under the difficult conditions prevailing on this Greek hillside would be almost certain to grow better elsewhere
