Wayne, J. Petley, C. Murray, L. Henderson, 2010-04-09 Why are young people alienated from television news This book argues that contemporary trends indicating deepening disconnection from news about public life reflect both problems in the way television news covers politics the single biggest item on the news and problems with the nature of politics itself under neo liberal capitalism *Young People and the Future of News* Lynn Schofield Clark, Regina Marchi, 2017-09-21 This book examines youth media practices on social media introducing the concept of connective journalism as a precursor to collective political action Key Scholarship in Media Literacy: David Buckingham Allison T. Butler, 2020-11-30 We live in a time of

unprecedented media use much of which can be accessed by devices that fit in our pockets Young people in particular make use of media on a near constant basis How can this media use be better understood This text focuses on the scholarship and research of David Buckingham a global leader in media literacy education and children s and young people s media cultures It is not an exaggeration to state that studies and applications of media literacy education around the globe are indebted to the scholarship of Buckingham and that more nuanced understandings of how children and young people make sense of their media choices are due in large part to Buckingham s work Key Scholarship in Media Literacy David Buckingham focuses on the key contributions of Buckingham s work over his prolific career illuminating the advances he made in the field of media literacy education and understandings of young people s media cultures Through a close look at Buckingham s theoretical advancements contributions to the larger field of media literacy education and the key strains of his research how children and young people learn what they already know about media and pop culture before they enter classrooms end media content about and for youth this text delineates Buckingham s vast bibliography and will be an invaluable resource for anyone curious to know more about children youth and media literacy education Analysis of Buckingham s work is drawn from his robust bibliography exploration of scholarship he has critiqued interpretation of contemporary social concerns through the lens of his research and formal and informal conversations with him over the course of several years **Youth**

**Culture, Education and Resistance**, 2010-01-01 Youth Culture Education and Resistance Subverting the Commercial Ordering of Life is a ground breaking collection of essays that illustrate how youth culture has the potential to build solidarity amongst teachers activists scholars and practitioners for the purposes of confronting the dominant ideological doctrine influencing life at today s historical juncture emblemized through neoliberalism as well as building a society free from oppressive social formations Several leading international scholars and educators provide empirically and theoretically rich portraits of youth challenging the commercialized status quo inside and outside K 12 classrooms They also illustrate how cultural manifestations of youth speak directly against the social actors who continually vilify youth as the source of their own marginalization and the world s suffering and misery *Encyclopedia of Science and Technology Communication*

Susanna Hornig Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their

grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science communication ethics

**Cultural Citizenship and Popular Culture** Joke Hermes, 2023-09-27 Written in an accessible and engaging style this book uses a series of case studies to show how popular media are important to us as a source of pleasure and entertainment but also in communicating about the world with others Social media platforms have changed how we talk about what we like and dislike in our popular media use Cultural citizenship shows how these discussions speak to belonging to what we feel our rights and responsibilities are in today's polarized world Cultural Citizenship and Popular Culture is based on audience led research and does not privilege textual analysis as a starting point for taking popular media use as a measure Instead it offers research tools to listen to others This book offers scholars and students of media and creative industries a means to understand their professional position as one in which they engage with rather than assume to know what users of popular cultural texts and products think and feel

Misunderstanding News Audiences Eiri Elvestad, Angela Phillips, 2018-04-09 Misunderstanding News Audiences interrogates the prevailing myths around the impact of the Internet and social media on news consumption and democracy The book draws on a broad range of comparative research into audience engagement with news across different geographic regions to provide insight into the experience of news audiences in the twenty first century From its inception it was imagined that the Internet would benignly transform the nature of news media and its consumers There were predictions that it would for example break up news oligarchies improve plurality and diversity through news personalisation create genuine social solidarity online and increase political awareness and participation among citizens However this book finds that while mainstream news media is still the major source of news the new media environment appears to lead to greater polarisation between news junkies and news avoiders and to greater political polarisation The authors also argue that the dominant role of the USA in the field of news audience research has created myths about a global news audience which obscures the importance of national context as a major explanation for news exposure differences Misunderstanding News Audiences presents an important analysis of findings from recent audience studies and in doing so encourages readers to re-evaluate popular beliefs about the influence of the Internet on news consumption and democracy in the West      **The Civic**
