

Don 'The Dragon' Wilson
Bloodlist series, Manhunt, Ninja Dragons

Directed by Paul Ziller

Bloodlist 4: Die Trying, Beyond Suspicion, Addicted to Love

A simple gift for his girlfriend plunges Don 'The Dragon' Wilson into a whirlwind of danger in a foreign land... he's somehow picked up the wrong package and now everyone is after him. Framed for murder and pursued for unknown reasons by police, terrorists and spies, he must now fight to discover the truth before it kills him... before he becomes a moving target.

On the run... out for revenge

A NEW CONCEPT PRESENTS DON 'THE DRAGON' WILSON MOVING TARGET ALL MURPHY HILARY KILMER

Moving Target Low Price:

Moving Target Defense Sushil Jajodia, Anup K. Ghosh, Vipin Swarup, Cliff Wang, X. Sean Wang, 2011-08-26 Moving Target Defense Creating Asymmetric Uncertainty for Cyber Threats was developed by a group of leading researchers. It describes the fundamental challenges facing the research community and identifies new promising solution paths. Moving Target Defense, which is motivated by the asymmetric costs borne by cyber defenders, takes an advantage afforded to attackers and reverses it to advantage defenders. Moving Target Defense is enabled by technical trends in recent years, including virtualization and workload migration on commodity systems, widespread and redundant network connectivity, instruction set and address space layout randomization, just-in-time compilers, among other techniques. However, many challenging research problems remain to be solved, such as the security of virtualization infrastructures, secure and resilient techniques to move systems within a virtualized environment, automatic diversification techniques, automated ways to dynamically change and manage the configurations of systems and networks, quantification of security improvement potential, degradation, and more. Moving Target Defense: Creating Asymmetric Uncertainty for Cyber Threats is designed for advanced level students and researchers focused on computer science and as a secondary text book or reference. Professionals working in this field will also find this book valuable.

Monetary Policy with Very Low Inflation in the Pacific Rim Takatoshi Ito, Andrew K. Rose, 2007-11-01 Extremely low inflation rates have moved to the forefront of monetary policy discussions. In Asia, a number of countries, most prominently Japan but also Taiwan and China, have actually experienced deflation over the last fifteen years. Monetary Policy with Very Low Inflation in the Pacific Rim explores the factors that have contributed to these circumstances and forecasts some of the potential challenges faced by these nations as well as some potential solutions. The editors of this volume attribute low inflation and deflation in the region to a number of recent phenomena. Some of these episodes, they argue, may be linked to rapid growth on the supply side of economies. Here, inadequate demand policy can produce what is referred to as a liquidity trap, in which the expectation of falling prices encourages agents to defer costly purchases, thereby discouraging growth. Low inflation rates can also be traced to the presence of a zero lower bound on interest rates, as well as the inflation targeting phenomenon. Targets have been set so low, the editors argue, that in some cases a few bad shocks lead to deflation.
