Moving And Learning:

Moving and Learning Across the Curriculum Rae Pica, 2007 *Moving and Learning Across the Curriculum More Than 300 Activities and Games to Make Learning Fun* is now out in its 2nd edition. Movement is the young child's preferred method of learning. This is because when a child physically experiences concepts they understand them more completely and retain the information longer. Retention has been proven to increase when children's senses are involved in the learning process and this book provides hundreds of activities that help to teach major concepts in the content areas of art, language, arts, math, music, science, and social studies. The domains of child development are completely intertwined in the early years, making it important to incorporate them all throughout the learning process. This book will show the early childhood professional how to educate the whole child, covering all of the domains of child development which include physical, social, emotional, and cognitive. To truly educate the child they must be recognized as thinking, feeling, moving human beings with the need to experience with all of their senses. *Moving and Learning Across the Curriculum 2e* provides the activities to achieve that level of learning with features including detailed lesson plans, outdoor alternatives, updated resources, and enhanced curriculum connectors with additional suggestions for children's literature and music. An ideal resource for the early childhood professional, this book offers everything needed to use movement as a teaching tool. *Moving & Learning Across the Curriculum* Rae Pica, 1999 *Moving and Learning Across the Curriculum* gives children the opportunity to physically experience concepts and themes common to the six major content areas of art, language, mathematics, music, science, and social studies. They can process the concepts using a multimodal approach that ensures greater comprehension and retention. Children are experiential learners, acquiring knowledge through play, experimentation, exploration, and discovery. *Moving and Learning Across the Curriculum* offers 315 activities and games that help them do just that. This is an ideal resource for educators who understand movement as a learning tool. *Preschoolers Moving & Learning* Rae Pica, Richard Gardzina, 1990 *Preschoolers Moving and Learning* is for children ages 3 to 5 years old. It comes complete with five audiocassettes and 40 lessons with 200 activities enough for a whole school year. Each lesson includes movement suggestions or lyrics to follow as well as problem-solving challenges to encourage children to respond creatively. The lessons cover the movement building blocks of locomotor skills such as bouncing and dodging, concepts such as laterality and opposition, and imagery such as being and doing. *Toddlers Moving and Learning* Rae Pica, 2014-03-17 More than 50 movement activities for toddlers. Physical education is a critical part of every early childhood curriculum. Children need to move to channel their energies in creative, beneficial ways and to learn habits for lifelong health and fitness. *Toddlers Moving Learning* provides more than 50 developmentally appropriate activities that contribute to a well-rounded curriculum in any classroom or program.
